

Secure Document Delivery:

Report cards, Progress Reports & More!

Save time, thousands of dollars, and countless sheets of paper!

Securely deliver important documents straight to individual parents electronically and reap many benefits:

- Save thousands of dollars in printing, mailing, employee, equipment & facilities costs
- Free up time once spent stuffing envelopes
- Help your office go green
- No more papercuts!

Save a dollar
per document
mailed!

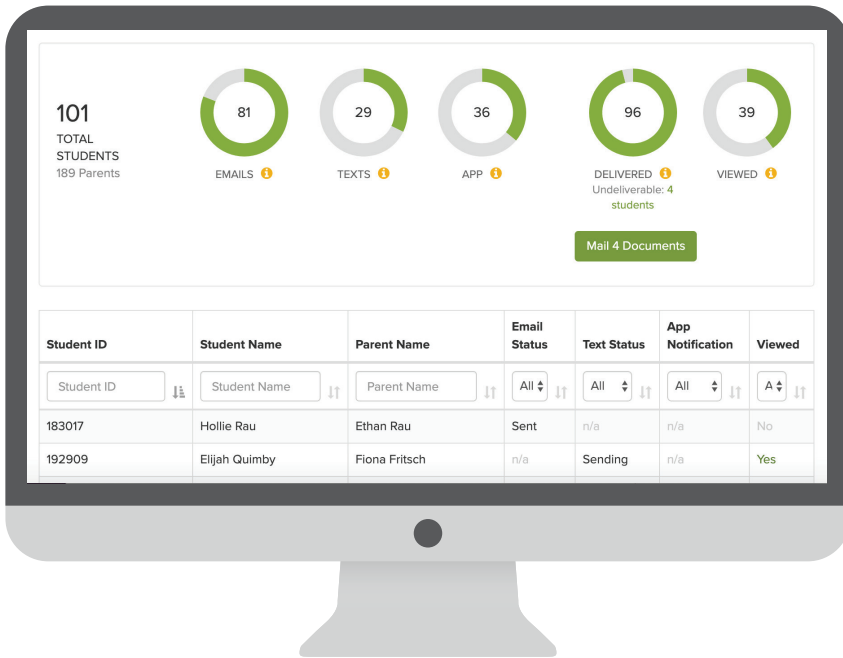

All you have to do is upload a master file of all student documents, and our smart technology will split up each document by Student ID number, even for documents of varying length.

Minimal work, major benefits!

ParentSquare's Secure Document Delivery is the only existing school-to-home technology that:

- Allows variable length documents in the master file
- Includes text, app and email notifications - reaching families in their preferred modality and language
- Will generate a separate PDF of files for parents who have not acknowledged the document's receipt
- You can print & mail these "missed" documents yourself or opt ParentSquare to mail them for you - ensuring 100% deliverability and equity
- Student ID can be transparent text or visible
- Lets you define your own templates (pre-made templates also provided)
- Gives you the ability to send or schedule the documents to go out at a later time

How It Works:

1.

Create your own template, or use a pre-existing one!

2.

Upload a file of student documents

3.

Write your own message* to accompany the documents, or use a canned message

4.

Send or schedule your document blast!

*supports multiple languages

What Parents See

1.

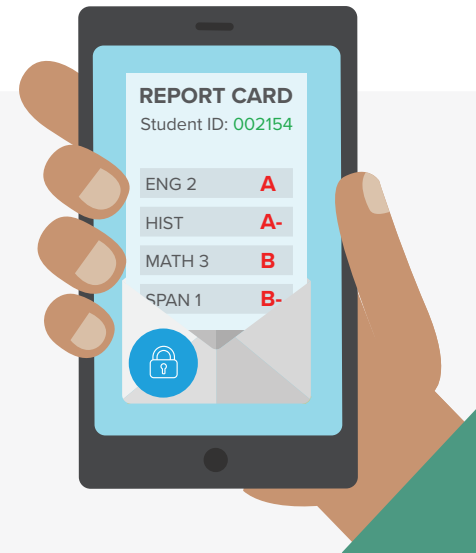

Parents receive an email, text or app notification with a secure link to their individual document

2.

Upon clicking their link, parents are prompted to enter their ParentSquare password (if on mobile, parents can use Touch ID or Face ID)

3.

Now parents have their student's document - it's that easy! If you don't want parents to see their kids' Student ID numbers, you can use transparent text
