

ABOUT DYNAMINE™

SELF-AFFIRMED GRAS
(GENERALLY RECOGNIZED AS SAFE) STATUS.

WHAT IS DYNAMINE™, WHAT DOES IT DO, AND WHY IS IT DIFFERENT?

THE BASICS

- Dynamine™, is a purine alkaloid found in the Kucha tea leaf (*Camelia assamica var. Kucha*) and Cupuaçu (*Theobroma grandiflorum*).
- The pre-clinical & pilot research is suggesting that it does not raise heart rate or blood pressure. Early observations show Dynamine™ **improves feelings of energy, mood and focus** with much faster onset of action.
- Dynamine™ is a tour de force because of its combined sensory experience and safety profile. We are unaware of any compound in the world with its level of sensory experience, while also achieving an extremely high safety profile known in its GRAS dossier.
