FOR IMMEDIATE RELEASE

Screencast-O-Matic Releases iPhone Screen Recorder To Use For Education
Easy-to-use mobile screen recording tool will help educators share and collaborate.

SEATTLE, June 25, 2019 — Screencast-O-Matic announced that it just released an intuitive iPhone screen recording app. The mobile screen recorder is in addition to the company's already multi-device suite of video creation tools.

The iOS screen recorder is enhanced with features to enable users to record their iPhone screen and audio narration. Educators and students can easily record and utilize features in scenarios including:

- Create video tutorials - Highlight apps or process on a mobile device.
- Showcase student portfolios - Students are able to adjust the speed and rotation of videos they've created.
- Create recordings on the go - Publish video updates while outside of the classroom and crop for popular social sites.
- Give meaningful feedback - Connect with students quickly and utilize facecam options for communication.

Once the app is installed, users can start recording their mobile screen. The user will have the ability to make adjustments to recordings including adjusting speed and rotation, cropping for social sites and overlaying their facecam. The app can be found in the Apple App Store. Additional details can also be found at <https://www.screencast-o-matic.com/iphone-ipad-screen-recorder>

All recordings are saved onto the phone and can easily be transferred to the Windows or Mac desktop video editor as part of the Premier plan. Once transferred, videos can be mixed with other recordings or videos and edited to create engaging videos. Screencast-O-Matic has helped more than 9 million users worldwide share and collaborate ideas and messages in education including school districts, colleges, and universities.

About Screencast-O-Matic

Screencast-O-Matic is a screen capture and video editing platform that takes visual collaboration to the next level.
