

# POWERING THE PERSONALIZED EVENT EXPERIENCE

EventBots are AI Chatbots that provide information about your event over text, anytime, anywhere.

When does the conference hall open? Where do I park? Who is the keynote? EventBots answer these questions and more in a simple but powerful way—AI Chat via text.

### Personalized Engagement

- Accurately answer hundreds of attendee questions asked millions of ways in 3 seconds or less
- Segment audience types (attendees, VIPs, sponsors, etc.) to deliver an experience specific to them
- Send push notifications by audience for just-in-time offers, event announcements, and emergency alerts

### Scalable Support

- No downloads or logins, updates or maintenance—attendees already have the technology and know how to use it
- EventBots are hard-working team members, answering high-frequency questions accurately 24x7x365
- Handle multiple conversations across multiple channels at the same time

### Better data = Better experience

- Monitor the attendee experience in near-real-time with the intuitive dashboard
- With a text open rate of 98%, attendees get the information they need, right when they need it
- Inquiry data is provided post-show to enable improved future event experience design

EventBots enable you to deliver a *personalized attendee experience*, driving greater engagement with and connection to your brand.
