

InstallAware
for Windows Installer

Windows Installer without Rocket Science

What's New in InstallAware X10?

What's New in Version X10?

- **Single-Click Install Template: No More Next's!**
- **IntelliScan: Visual and Script Editor Error Detection**
- **Code Preview: Setup Script Topology Viewer**
- **Windows Features Plug-In 2.0**
- **Multi-Part Download File Plug-In**
- **Setup Engine Download Handler Plug-Ins**
- **Azure DevOps Services Integration**

Windows Features Plug-In 2.0

Configure Windows Features and Server Roles:

- Easily make your selections from a user interface that mimics the **“Turn Windows features on or off”** applet
- Windows Features Plug-In 2.0 **accurately reflects features and dependencies** found in every single OS release
- **Precision-configure** all client and server operating systems, platforms, and versions **from a single command**
- **The only** industry solution offering **fully up to date** and **accurate feature and role mappings!**

Setup Engine Download Handlers

A New Class of InstallAware Plug-Ins:

- Plug-Ins may now **register** themselves as **download handlers**
- The new **Use Download Engine** command switches between internal and plug-in download handlers at runtime
- Acquire **Web Media Block** data from any source, including **peer to peer networks!**

IDE Enhancements

The most advanced IDE just got better:

- **IntelliScan**: Functions like the **squiggly red lines** found in word processors, highlighting errors that would break your build before you start – both in the **script editor** and the **visual designers**
- **Code Preview**: Displays your **setup script topology** and allows instant access to any part of your scripts with a single click

Single-Click Setup Template

Modeled after the MSIX Installer user interface:

- **One-click to install software.**
- **One-click to uninstall software.**
- **Fully customizable user interface.**
- **Fully customizable installation logic.**

Copy-and-paste just a few lines of code **to upgrade** your existing installations to the new Single-Click installation experience!
