BotanaSolv™ 200

BotanaSolv™200 is a blend of 200-proof grain alcohol with 5% high purity n-heptane. These ingredients have been safely used for many years for botanical extraction and edible oil recovery. Using the **BotanaSolv™200** blend does not require a special permit to ship and is Federal Excise Tax free.

STARTING PRODUCT:

- 200 Proof USP Grade Alcohol

PROCESS:

- Using the highest quality 200 Proof USP Grade Alcohol, we then blend it with the 5% High Purity n-Heptane

BENEFITS:

- Lower cost, highest purity botanical extraction solvent alternative
- No permits are required to purchase
- Not subject to the Federal Excise Tax
- Same performance as pure alcohol for most applications
- Thousands of dollars of savings per containers versus purchasing pure ethanol

DISCLAIMER:

- Heptane has a higher boiling point than ethanol, which may result in higher energy costs.
- Residual solvent testing must be conducted on finished product.
- Consult with your equipment supplier to ensure a quality extraction will be reached without much change to your processes.

PACKAGING OPTIONS:

- Available in drum, tote and bulk tanker quantities
- Packaged product is available to ship next business day from our St. Louis, MO facility.
- Lead time to your facility, at most, should be 5 business days depending on your location.
- CoA provided with every delivery.

We supply pure and denatured (SDA & CDA) alcohol with multiple packaging options for various industrial applications such as hand sanitizers, anti-bacterial lotions, fragrances, detergents, adhesives, coatings, automotive, etc.
