

New Hi5 Furniture headquarters highlights brand's 2020 growth

The accompanying showroom presents a unique, museum-like experience for customers

Riverside, Mo. (March 13, 2020) – Hi5 Furniture Inc., an award-winning, woman-owned manufacturer of high-quality, hand-crafted commercial tables, formally completed its move to its new headquarters. Located at 4304 NW Mattox Rd., the new location is a reflection of the company's vision for growth in 2020.

“We knew the next step wasn't just to move to a new factory,” said Dawn Boileau-Yates, President and CEO of Hi5. “It was critical we create an environment to offer state-of-the-art product innovation and provide our company and staff with opportunities for growth.”

The headquarters' contemporary warehouse features an exhaustive space where the company's engineers have access to state-of-the-art manufacturing equipment and technological advanced quality assurance testing. Design, modeling, development and all processes are done within the facility to meet the top-notch standards that Hi5 customers have always expected, with the customization in products that keeps clients enthusiastically coming back.

“Custom is Our Standard' is the Hi5 Furniture motto,” Yates said. “We take pride in being able to offer a variety of colors, laminate and features in our expansive collections of creative tables.”

Along with the new warehouse, the company's modern showroom is exceptional. Designed with an open, museum-like aesthetic, the Hi5 tables are featured and interaction is encouraged – in an experience that designers and clients will enjoy. Potential clients are encouraged to interact with tables and view product details in ways that aren't possible through catalogs or online stores.

“To give potential buyers a better sense of our tables, we encourage them to interact with each piece to see how they feel, what they might prefer in their offices, or what might inspire them in their next project,” said Yates. “If you visit the showroom in Riverside, you don't have to imagine our tables, but will get to experience first-hand, each piece in the ideal, comfortable settings they inspire.”

Hi5 products are featured Dallas, Houston and Boston showrooms. Beyond the showroom experience, Yates is enthusiastic about what the new headquarters means for Hi5's role in Riverside.

“We're incredibly excited about the space's potential and being part of the local community,” she said. “We've always been committed to crafting quality, American-made products, and our promise is to always be an asset for the city.”

About Hi5 Furniture

Hi5 Furniture, Inc., is a woman-owned, Kansas City, Missouri-based company established in 2008 by a mother-daughter duo and a brilliant engineering partner, all of whom believed in bringing jobs back to their local community. All products are engineered based on utilizing local vendor capabilities. In 2009 during a down economy, Hi5 introduced new business to several wood mills, steel plants, powder coating and custom fabrication factories throughout Kansas and Missouri. Hi5 is proud to preserve the tradition of hand crafting furniture in America. Based in the “Heart of America”, Hi5 is committed to advancing the lives of the people in the local community while maintaining true American quality.
