Synagro Invites Municipalities, Farmers and Communities to Visit Newly Launched Website

The new website showcases Synagro's commitment to protecting the health of our water, our Earth and those who depend on them.

BALTIMORE, Maryland, March 24, 2020 – <u>Synagro Technologies, Inc.</u>, the preeminent provider of biosolids and residuals solutions services in North America, is pleased to announce the launch of its new website.

"Our new website, which was created for us by <u>Drio</u>, is modern and easy to navigate," said Matt Robertson, chief commercial officer, Synagro. "Most importantly, it focuses on the positive benefits our work yields to our customers, the environment and the communities in which we live and work.

"Synagro's story is a good one and tells the world that we are much more than a biosolids solutions provider," added Robertson. "Our work protects the health of our water, our Earth and those who depend on them. We are helping to clean the water supply by helping our customers choose the right technology to manage their biosolids. We return earth to the Earth, and we help our environment even more by doing so."

Visitors are encouraged to check out Synagro's new website at www.synagro.com.

About Synagro

Founded in 1986, Synagro Technologies, Inc. works to turn waste into worth by helping more than 600 municipal and industrial water and wastewater facilities in North America move toward safer, cleaner and more environmentally beneficial practices. For some, it's simply cleaning the water supply. For others, it's much more – we partner with them to process their waste for compost or energy pellets, creating healthy soil and sequestering carbon in the process. As the largest recycler of organic by-products in North America, we're trusted because we remove risks while keeping the logistics clean. Because we have the most experienced team in the industry, we can offer tailored solutions that ensure no waste goes to waste. Much of our work isn't pretty. But a greener world emerging from a cleaner one – worth coming from waste – and we think that's pretty beautiful. Visit synagro.com to learn more.
