

June 10th, 2020

Alexandria, VA – Veterans Enterprise Solutions, Inc. (VESI) announces market expansion for the OneNet™ computer-aided dispatch (CAD) solution with the Aquia Harbor Police Department.

Aquia Harbour is a premier gated community located south of Washington, DC. The private community includes over 2300 homes situated on nearly 2,000 acres of wooded rolling terrain west of the Potomac River along the Aquia Creek. The Aquia Harbour Police Department (AHPD) provides 24x7 services to the large private suburban community.

Like many public safety organizations, the AHPD lacked a modern emergency computer-aided dispatch (CAD) solution. AHPD staff utilized legacy and, at many times, manual processes to document the information regarding the incident location, situation, and persons involved. Using the legacy or manual processes, AHPD dispatch staff would document the incident and then communicate it to the appropriate first responders. This documentation process was slow, lacked real-time geo-spatial information, did not conform to APCO or NENA specifications, and lacked the staff's ability to quickly query historical information.

The AHPD deployed the commercial off the shelf (COTS) software as a service (SaaS) OneNet CAD solution to successfully replace its legacy process. The AHPD is now using the modern Microsoft Azure Gov cloud-based platform to help the department's employees do more while in the office or mobile.

OneNet CAD has enhanced our day to day public safety operations and record management allowing us to provide an even higher level of service to our community. – Chief Nathan Thompson, AHPD

We are grateful to have the AHPD join VESI's expanding customer list with our successful deployment of the OneNet CAD solution. – Cliff Gandy, CEO

About VESI

VESI is a successful Veterans Affairs verified Service-Disabled Veteran-Owned Small Business (SDVOSB). Many of VESI employees are veterans and family members of veterans who are dedicated to "continuing the mission." VESI provides the government with quality Information Technology services and solutions, Intelligence Analysis, as well as Administrative and Management Consulting services and support.
