

Propylon® Unveils New Vision Strengthening Its Position as A Disruptive Leader in the Management of Changes to Laws, Regulations, Policies, and Guidance

NEW YORK, 29 JUNE, 2020

Propylon® today announced its new vision, “***disrupting the legal and regulatory publishing landscape with innovative solutions that simplify the complex and connect people with the law***,” setting the tone for strategic growth and business direction for Propylon for the next five years and beyond.

The announcement of the new vision represents Propylon’s drive and motivation for expansion across all aspects of business operations. Recognized as one of the Best Workplaces in 2020, for the third time in recent years, the company has seen 40% business growth in the last three years alone with the expansion of its client base and streamlining of product capabilities, solidifying its position as a global leader in the market. The company marked the 20th anniversary of its founding last November, so it is timely to set the strategic vision as Propylon moves into a new era of strengthening its position as a disruptive leader in the marketplace.

“We are excited to share our vision for the future of Propylon, a vision which helps shape and guide our business model, our client partnerships, and our work ethos,” said Propylon’s CEO, John Harrington. “Our focus over the last 20 years has evolved alongside the needs of our clients. Our new vision guides us to evolve and expand by delivering innovative solutions that not only meet, but anticipate, the future needs of our clients.”

The new vision establishes Propylon’s commitment to simplifying the complex to make legal and regulatory material useful to all by connecting clients and citizens with the law. This new vision connects Propylon with a greater purpose of making a positive impact in the world. It is timely that this strategic alignment of business objectives, core values, and vision comes as we move into a new era of digital, post-pandemic restrictions from Covid-19.

“Disruption is a facilitator of true innovation, a core part of Propylon’s mission, vision, and values, which is needed now more than ever before,” said Propylon’s CEO, John Harrington. “Working from a model that places an emphasis on the positive aspects and impact of disruption allows us to be truly creative in our approach to success. Disruption for us means anticipating the future needs of our clients and creating new ways of solving those needs.”

Since its inception in 1999, Propylon has been at the forefront of innovation and progress in the sector, driving advancement through technology. Its new vision puts innovation firmly at the center of its business model for the long-term.
