

## VISITOR AND STUDENT MANAGEMENT

Safety starts at the front door. Visitor Aware provides the tools to screen visitors so your organization can identify threats before they gain access to sensitive areas. Provide peace of mind with comprehensive tools that verify guests and volunteers, account for your people during a crisis, and assist with reunification when critical events have ended. Using technology you already own you can create a secure environment that makes it evident from the moment someone enters your buildings that safety is a top priority.

## DISCOVER THE VISITOR AWARE DIFFERENCE

Not all management solutions are created equal. See what sets Visitor Aware apart from the competition:

- **Encrypted facial recognition** results in fewer false positives
- **No proprietary hardware** means you save money by using tools you already own
- **District-wide insights** eliminates the need for parents and guardians to check-in multiple times on the same day
- **QR codes** help identify and verify visitors with ease
- **Preregistration links** save time and hassle
- **Mass notification and incident management compatibility** with our InformaCast software

## VISITOR MANAGEMENT

### Visitor Check-in and Check-out

Scan guests' IDs to screen every visitor that comes through your doors with encrypted facial recognition.

### Volunteer Management

Use custom volunteer applications to quickly collect information and approve individuals. Run criminal background checks on volunteers through our software or a third party vendor. Once approved, volunteers can sign in and automatically record their hours.

### Visitor Verification

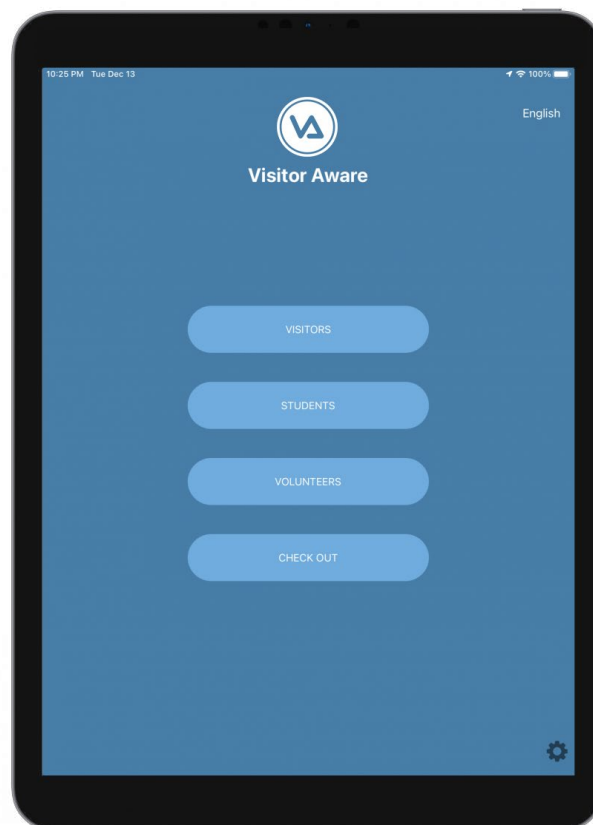

Immediately validate visitors and volunteers against national sex offender and government watchlists and active legal injunctions. Maintain a list of banned visitors who should be flagged when trying to check in to prevent known offenders from gaining access.

### Student Tardy

Track student tardiness and replace pen and paper records with a digital solution. Record a student tardy, print passes, and create easy ways to track tardiness.

### Secure Student Release

Quickly identify visitors who may pose a threat and/or individuals not approved for student pick-up. Release students only when visitors have completed the screening process and are confirmed as authorized guardians.

## STUDENT MANAGEMENT

### Rostering and Reunification

Account for students during a crisis and streamline family reunification after any incident while increasing security measures and documenting every step.

### Secure Carpool Line Student Pick-up

Streamline your carpool line pickup process while keeping students safe in the building by enabling pick-up coordinators to validate guardian relationships in real-time as cars line up.

### Tip Line

Submit school security tips to quickly inform school resource officers, staff, or school administration of situations that may impact student and staff safety. School safety tips can be submitted with contact information or remain completely anonymous.
