Corporate Information

SwissDisk is an Internet Communications Service Company that provides online access to (private key) Encrypted Storage Solutions. It is wholly owned by SwissDisk Incorporated, and was established to meet the ever-growing demands of the IT world for quality middleware products and enterprise systems that support security conscience users in today's desktop and mobile computing landscape.

Using our patent pending sDrive™ technology, we have deployed an innovative and industry leading service of online encrypted filesystems. Our mission is to deliver unparalleled accessibility to these filesystems using any web-enabled device via the utilization of standards-based technologies in an architecture-independent environment, ensuring service to the broadest customer base possible to provide SwissDisk the greatest capability for market growth while maintaining the highest customer satisfaction and commitment to quality.

filesystems."***

Our Leadership

SwissDisk combines its industry leading product and deep subject matter expertise with an award-winning technical and creative executive team:

Ben Collins
Founder, President, Chief Information Officer

Ben Collins brings more than 12 years of experience in programming and systems engineering from a variety of Open Source, Security, and Embedded Systems industries to the SwissDisk executive team. He leads a number of Open Source projects relating specifically to the Linux community, including the Linux kernel IEEE-1394/Firewire development. He formerly held the elected position of project leader for the Debian GNU/Linux operating system, which is popularized due to its wide support base for various chip architectures and direct support by such companies as IBM, Sun Microsystems, and Hewlett Packard. During his term as DPL, he specialized in the UltraSPARC port and provided guidance and leadership for the continued structure of the Debian movement by championing proactive security and testing policies. Additionally, Ben has consulted and produced embedded products for both Watchguard Technologies by providing kernel and driver development for their FireBox® integrated security hardware and DEQO Solutions where he architected and engineered a suite of digital HD-PVR (High Definition Personal Video Recorder) applications using custom built hardware, software and networking protocols for their proprietary use.

Ken Collins***Founder, Vice-President, Sales and Marketing***

Ken Collins has an extensive 12-year background in integrated marketing and communications, which includes strategies to advertise, secure, and maximize on geographical and vertical markets in the United States and overseas. He brings a unique combination of creative advertising with a wealth of hands-on IT knowledge to the SwissDisk team. Prior to joining, he served as Technical Director for Hampton Roads' premier interactive advertising agency, Stratum New Media, where he provided leadership for both their Creative and IT departments. His responsibilities included identifying customer requirements, making build-versus-buy decisions, maximize technology partnerships, and developing products and ideas to capitalize on existing and emerging market opportunities. His work incorporated proven marketing results that won several key awards for their national clients including an AAF 3rd District Addy. Ken has also served as the lead consultant for InfiNet's product development department, a division of Gannett Media Technologies International, wherein he engineered and developed their Macintosh CD-ROM Internet Software distribution method for all their affiliate newspapers and subscribers throughout the country.
