

# VoiceSuite

voice-over project management

web based  
software solutions

## a platform for the future

As the global leader in on-demand voice-over project management, VoiceSuite delivers more complete voice-over jobs than any other project management solution.

The highly acclaimed VoiceSuite software-as-service solution delivers more features, more powerful customization, easier integration and the best end-user experience.

And best of all, it can be deployed immediately around the globe.

## discover VoiceSuite

- State-of-the-art project management solution.
- Comprehensive database of more than 1000 professional voice-over talents representing more than 40 languages.
- Built-in request-for-quote and online audition tools so you can always select the best voice for the job.
- Online collaboration and file sharing for better decision making.
- Best end-user experience.

## improve effectiveness

VoiceSuite is web-based software empowering you to manage voice-over projects effectively and efficiently.

## the marketplace

Create a project by detailing your job requirements, budget range and deadline.

Voice talents are instantly notified by email and are invited to respond to your request.

Receive a brief proposal, price quote for the job and an MP3 voice-over audition from a variety of professional voice talents.

Award the project to the best voice for the job. Leave feedback on your business transactions.

## delivery

Finished work can be delivered in any digital format via express shipping, secure download or by e-mail.

## rates

- \$499/year for the first seat
- \$199/year for every subsequent seat

\* Prices are in US Dollars.

## revolution in simplicity

Interactive Voices Delivers VoiceSuite to:

- Quickly search for voice talents
- Efficiently manage projects
- Improve decision making
- Save time and money
