

## The main features of GKB:

- practical and comfortable user interface
- Microsoft Word style article editing tool
- up to 128 GB of data storage
- ability to group articles
- notes and attachments are available for each article
- fast article search
- spell check
- password protection
- advanced search options
- print and preview using templates
- ability to export articles to PDF, HTML, RTF, TXT and Microsoft Word
- support of client/server database technology
- online updates
- big variety of customizing options
- does not install additional files in other directories
- does not require additional DLLs, VBXs, OCXs and much more.

## Electronic Extension of Your Memory

*If what you crave for is an inexpensive information manager with the ability to share its content with friends or co-workers, look no further than General Knowledge Base (GKB). Designed for the Windows platforms, this application provides a centralized location for documents, images and other types of files which are organized into the searchable knowledge base. Using the inbuilt Word-style editing facility, the knowledge base can be edited with a remarkable ease and its content can be accessed locally or remotely over the local network and the internet.*

“General Knowledge Base is an extension of human memory” says Tomas Rutkauskas, author of GKB and CEO of Baltsoft. “Culture is all about creating extensions. For example, a coat is an extension of our skin that keeps us warm, a mobile phone is an extension of our mouth and ear that enables distant talks and a remote control is an extension of our hand to control a TV remotely. They all extend our capabilities and make our life easy and convenient. We created GKB to extend our information management capability. It allows you to accumulate a massive amount of knowledge and store it in the digital form, readily available to anyone, anywhere.”

Creating a knowledge base with GKB is a breeze. The program has an inbuilt editor whose uncomplicated Word-style design is familiar to millions of users. Among many other options, it supports tables, hyperlinks, styles, right-to-left languages and spell check. Customers will also discover the ability to export articles created in GKB to many popular formats, including TXT, RTF, DOC, HTML, XML and PDF. Individual or batch mode export is available. Once you created an article in the editor, you can attach notes, descriptions to it and group it with other articles. The advanced search facility supports a search based on different document criteria.

Designed with an ordinary user in mind, GKB has become popular with a wide spectrum of customers. “I downloaded over a dozen trial versions of PIM’s. If I had started with GKB, my search would have been over right away,” says Kathryn Kortay. “Not one PIM met my criteria except GKB: easy to learn, reasonable price, no size restrictions on files, intuitive structure for categories within databases, advanced search features with “easy to browse” method to make retrieving articles simple. And these are just a few to name. Normally, when I am learning a program I hit a “wall”, become completely frustrated and just plain “give up”. With GKB’s tech support and user forum, I feel the support of others and get fast answers when I need them.”

## GKB pricing:

- **Single computer usage** license. The user purchases one license to use GKB on one computer. License price: \$39.00
- **Multiple usage** license. The user purchases a number of usage licenses for use, by the purchaser, the purchaser's employees or accredited agents, on the same number of computers. License price: \$39.00 x number of licenses
- **Site usage** license. The user purchases a single usage license for use, by the purchaser, the purchaser's employees or accredited agents, on an unlimited number of computers at the same physical site location. License price: \$300.00
- **Corporate, national or international usage** license. The user purchases a single usage license, authorising the use of product, by the purchaser, the purchaser's employees or accredited agents, on an unlimited number of computers, regardless of location, but owned or under the control of the purchaser. License price: \$600.00

The main difference between Site and Corporate licenses is that Site License can be used only in companies' office, in one building only.

Having Corporate License GKB program can be used on as many computers as company needs, also have it at home, at branch offices, client offices and etc.

**Registered customers are entitled to free updates and lifetime technical support.**
