Integrated Workforce Forecasting :: Labor Scheduling :: Human Resources

The Most **POWERFUL** Workforce
Management Solution

Workforce Management Suite

The eRestaurant Services Human Resources Screen is an easy to read command center for all your business critical information. Names, phone numbers, addresses are available at your fingertips. Information is updated in real time and immediately available.

The Team Scheduler allows you to schedule employees. Graphs showing scheduled vs. forecasted; scheduling conflicts are highlighted as the schedule is created.

Workforce Management Suite

Workforce Management Suite improves profitability by ensuring that optimal staffing levels are in place to effectively meet customer demand. Managing labor costs, employee turnover, human resources, and training is critical to running your business smoothly and profitably. The Workforce Management Suite of applications are smart, web based, fully integrated solutions, designed to help you exceed your guest service expectations while lowering labor expenses, your single largest controllable cost.

Accounting and Budgeting

- Create financial operations plans
- Feed budget information from corporate GL systems
- Incorporate labor costs into real-time unit level P & L reports

Forecasting

- Generate demand-based schedules using a variety of forecasted metrics, such as historical sales and customer traffic data, seasonal variations, and staff productivity data.
- Fully configurable forecasting engine
- Accommodates complex labor matrix models
- Forecast for any time interval
- Base forecasts on sales, guest traffic counts, transactions, sales mix
- Incorporate fixed, variable, and event driven labor deployment

Human Resources

- Full employee life cycle management
- Tracks employees from hiring to termination
- Instantly assign universal employee numbers

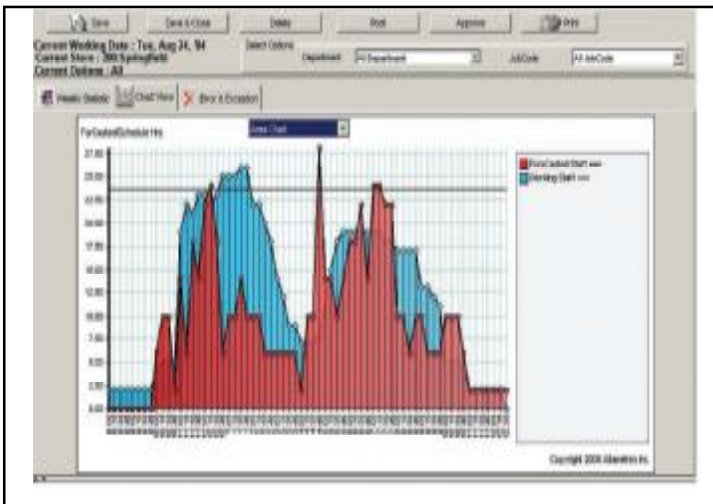

Employee Scheduling

- Automates the scheduling process
- Enables proactive decision making about labor deployment
- Provides tools to handle changes and expectations
- Contributes to employee satisfaction and retention
- Optimize labor deployment based on forecast, business rules, labor laws, job assignments, and employee availability
- Share employees across multiple locations and identify conflicts in real-time

Time and Attendance

- Automates manual time collection process
- Calculates payroll hours and cost accurately and in real-time
- Improves control of labor resources via schedule and punch validation
- Enforces consistency of company policies
