

# CyberWorx DLP© Information and Pricing

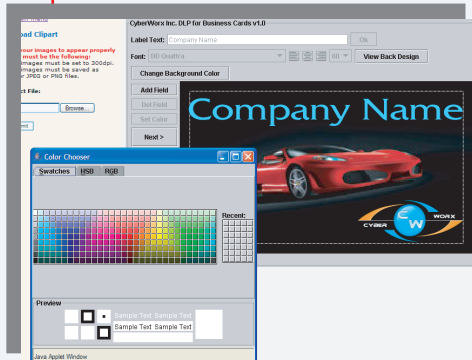

## DLP© - Online Design Software

(Design, Layout, Print)

**CyberWorx DLP© Online Design Software allows your customers to design and submit, ready-to-print, artwork directly from your website.**

**Main Design Interface**

**Color Chooser**

### Features:

1. Customers can add/edit text and move it anywhere on the image by simply dragging their mouse.
2. Customers can use their own system fonts which are outlined in the final image. No more missing fonts!
3. Customers can upload images and logos from their own computer and drag and drop them in the design field.
4. Proof is immediately available after design is finished.
5. Final images are layered and output at your choice of 150-1200dpi.
6. Supports custom templates, drawing dimensions, and bleed dimensions..
7. Customer designs are cataloged and stored in a database for future retrieval.
8. Integrates into your existing ordering system and database.

### How it works:

1. Customer creates a design for their printed piece.
2. Design proof JPEG is displayed to the customer.
3. Customer submits design.
4. Design is converted into vectored and outlined format to ensure there are no font or dpi problems.
5. E-mail notification is sent and design is available to you on the web.
