Safefright Technology and Tectus Enter Reseller Agreement

VANCOUVER, WASHINGTON // - Safefright Technology, a leading provider of advanced [GPS security](#) and [fleet management technology](#) for mobile and transportable assets, and Tectus LLC, a professional services, security solutions provider, have announced a strategic alliance.

Safefright Technology specializes in optimizing security and mobile asset management. Through the use of [GPS tracking software](#), diagnostic sensors, and real-time wireless communications and Internet software applications, Safefright's SmartFleet™ System provides clients with complete visibility and situational awareness of mobile and transportable assets. "With Tectus as a partner, Safefright can broaden its market reach in the United States and further deliver unparalleled security and management solutions. We sought a partner that offered a comprehensive security consulting solution, and identified Tectus as having the complementary depth that Safefright was seeking to round off its own offering," said Curtis Serna, Chief Executive Officer and President of Safefright Technology.

Tectus provides a variety of [security project management solutions](#) including complex vulnerability assessments, C-TPAT support, and trade compliance services to business, government, and non-profit communities. With expertise in both domestic and multi-national organizations, Tectus effectively works with clients to develop appropriate strategies and secure their global infrastructure. The alliance with Safefright Technology gives Tectus access to wireless technology which will significantly expand Tectus' ability to deliver client-focused solutions. "Safefright's industry-leading [AVL technology](#) and data management systems will provide excellent security management capabilities for our clients" said Mark Storen, President of Tectus. "This alliance also enables us to jointly go to market with new solutions that combine superior technology and outstanding professional services."

About Safefright

Founded in 1998, Safefright Technology is a developer and provider of security-enhanced fleet management technology. Through its SmartFleet™ System, Safefright provides full vehicle security and visibility through proprietary security technology, 24/7 [GPS fleet tracking](#) and monitoring, control capabilities, and wireless diagnostic sensors. This system offers a perimeter of security that mitigates threats by providing complete situational awareness of vehicles and other mobile assets along with command and control capabilities. As experts in [homeland logistics](#) and [transportation security](#), Safefright Technology can help to meet your business and security objectives.
