## Commentary

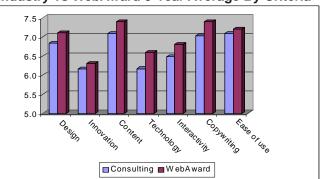

Consulting Web sites are generally in line with overall ISAR Index for Web development, although they have under performed each of the criteria benchmarks for the past three year period. Consulting Web sites are strongest for content, copywriting and ease of use due to the usual information-centric format used by most sites in the industry. Innovation and use of technology are the areas where the industry scored the lowest.

# **About this Report**

The Web Marketing Association has collected industry Web site development benchmark data since 1997 through it's WebAward program. Multiple independent judges review and score each site from 0-10 points on each of seven criteria for a possible 70 points. Best of Industry WebAward is given to the site that scores highest in the industry. The views of this report are based on observations of aggregated industry data and do not reflect the results for any particular Web site unless noted. For complete information, go to www.webaward.org
