Red Alerts Unified Messaging and Notification, sending your business's Time-Sensitive Messages to any Device with Statistical Results announces Free Voice, SMS Pagers, Text and Email messages when trying our web-based service

Red Alerts Web-based Unified messaging; Voice, SMS and Text Message and Email

The Red Alerts unified messaging and notification web-based service will speed delivery of your important and time-sensitive messages to your members. With a touch of a button you can send voice messages, email messages, pager messages and text messages to thousands of people. Communicate to an unlimited number of individuals or groups on cell phones, landlines, and SMS pagers, PDA's and through Email. Red Alerts is more than just a call service.

Set-up is quick; it's easy to use and inexpensive. In fact the cost is just pennies a message.   Pay only for what you plan to use and pay no set-up fee during this introductory period.

Take a free test of Red Alerts messaging by going to our website at www.redalerts.net and click on the Send a Test Message Now to see how great a communication tool we have for your organization. Test it and go to www.redalerts.us and create an account and receive Free 20 30-second voice messages, 20 SMS pages, and 20 Email-messages as a way for us to introduce our Red Alerts messaging and notification service.

Businesses can benefit from Red Alerts by utilizing our Automated Event-Driven Messaging service. You can use RULE engine or a database query to activate the alert. Two level login user rights – one user has administration rights and can change the database and the sub-account user can send messages but can't modify the database.

It's as easy as uploading a spreadsheet list to a database, store and access for messaging. Add a single name, send now or pre-schedule. Our product shows statistics of receipt. Create voice messages from text to speech or prerecord WAV file for voice messaging. Businesses and organizations can send a message now and see the Results in Real Time.
