Revolutionizing ePayments and Business Process Automation for Microsoft Dynamics

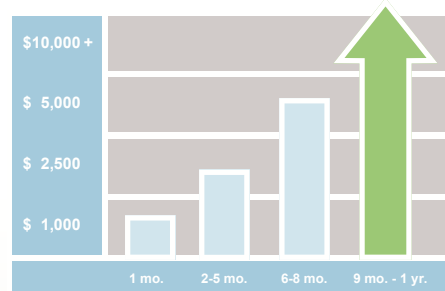

Simplify Credit Card Processing

Companies today need a system for accepting credit cards that is fast, secure, and reliable. **Credit Card Advantage** speeds and simplifies credit card processing from the instant a card is processed to end-of-the-month reconciliation. Faster approval times and automatic data transfer to your Microsoft Dynamics accounting solution increase productivity, reduce overhead, and streamline business operations. With the recent addition of **Merchant Services**, Nodus is your “one stop shop” for all e-payment needs.

Credit Card Advantage Features Deliver Rapid ROI:

Estimated Return on Investment

- Encryption & Number Masking
- Real-Time Verification
- Batch Mode Verification
- Automatic Reconciliation
- End of Day Procedures
- Card Transaction Reports
- Level 2 and Level 3 Verification
- Advanced Fault Protection
- Multiple Payment Gateways
- ACH, And More!

This solution goes beyond just standard credit card processing. Tight integration with gateways, processors, and back office environments delivers flexible, reliable services from first transaction on. **Credit Card Advantage** is simply the most powerful and secure electronic payment solution in its class!

PCI Compliance - Encryption, Assessment, and Security Scanning

Nodus provides the only commercially available **Credit Card Encryption** solution which features advanced 128-bit encryption for all credit card information stored in the Microsoft Dynamics GP database. All credit card numbers are masked down to the last 4 digits, meeting the strictest state and government requirements. It comes with access controls and full audit trails. In addition, Nodus offers a PCI self-assessment questionnaire, as well as quarterly security vulnerability scanning to meet full PCI Compliance.

Experience The Value of Business Process Automation

In today's highly competitive market place, companies cannot afford to be held up by disconnected systems and manual data entry. Speed and simplify e-commerce orders and e-payment processes with eStore Solution Stack and leverage real-time information for smart and insightful retail management with Retail Advantage for Microsoft Dynamics GP.

Both **eStore Solution Stack** and **Retail Advantage** are designed with state of the art - Service-Oriented Architecture (SOA), to provide real-time information and facilitate data exchange with business partners, which make these solutions readily adaptable to your changing business needs.

Taking E-Commerce & Retail to the Next Level with GP Integration

eStore Solution Stack provides a fully featured shopping cart, robust electronic payment processing engine, and powerful integration with Microsoft Dynamics GP. It fulfills both B2B and B2C e-commerce requirements, with optional electronic bill presentment and payment (EBPP) as well as full integration with RMS Store Operations.

Retail Advantage employs a unique approach to integrate and map the RMS Store Operations/POS database at the store level directly to the Dynamics GP database, providing real-time operation information while benefiting from the advanced supply chain management features Dynamics GP has to offer.

“Nodus Technologies gives us the functionality we need to unify our physical storefronts, online store, and back office. Using Nodus' solutions, we've streamlined our order acceptance process. The results include a rapid return on investment with significant annual savings previously spent paying staff to manually process and reconcile transactions.
