

ReportAdmin for ACS

Streamlined reporting for Microsoft ACS

With ReportAdmin for ACS, you'll get a complete view of the ACS database and the data coming into it for fast filtering and comprehensive reporting.

The Challenge:

With Microsoft Systems Center Operations Manager 2007 (SCOM) and Audit Collection Services (ACS), you can easily collect and store audit events. But reporting on that data is another story.

While ACS provides some standard, built-in reports, most organizations require deeper, more flexible analysis and reporting not found in ACS. You could write lengthy manual scripts to dig down and get at the in-depth reports your organization needs. Or you could choose ReportAdmin for ACS for greater flexibility and automation.

The Solution:

ReportAdmin for ACS maximizes your investment in SCOM and ACS. By extending ACS functionality, you can streamline the way you now get data from ACS with enhanced reporting capabilities and consolidated collector reporting. You'll get more detailed reports—automatically.

While bypassing manual scripting with ReportAdmin for ACS provides simpler, more automated reporting and analytics, you'll also realize some bigger benefits: improved productivity and reduced costs. Ready to go deep?

Key Features:

- Provides consolidated collector reporting within the ACS Management console.
- Includes a built-in report library and custom reporting templates.
- Integrates with Microsoft SQL Reporting Services (SRS) for automated report generation and delivery.
- Translates event codes into meaningful descriptions.
- Offers high level summary to detail drilldown.
- Provides multiple reporting database support.
- Permits you to publish reports while showing only the data you need to see.
- Allows authorized users to subscribe for automated scheduled delivery over the web.
- Empowers users to customize their own reports.
- Features both live and historical reporting capabilities.
- Supports custom rules to filter and forward targeted events to multiple reporting databases.
- Supports advanced analytics and faster reporting performance via a OLAP cube.

Enhance Audit Collection Services Reporting

Maximize your investment in Systems Center Operations Manager 2007 and Audit Collection Services with ReportAdmin for ACS. ReportAdmin for ACS extends the reporting capabilities of ACS to give you deeper data analytics and reporting. Plus, it integrates with ACS so you can continue using the tool you already use—without additional training or investment.

Generate Easy-to-Read Reports in a Snap

Through tight integration with SQL Reporting Services (SRS), ReportAdmin for ACS enables automated delivery of detailed reports to your management, and constituents requesting data from the ACS database. ReportAdmin for ACS incorporates web-based subscription services so you can set authorization and delivery settings based on individual preferences.

About NetPro

NetPro provides unprecedented control over your Windows infrastructure with software solutions that drive security and compliance into your organization while increasing operational efficiency and productivity. More than 6 million users—from such respected organizations as Coors Brewing, the U.S. Army, and General Motors—optimize their Windows networks with NetPro solutions.

Key Benefits:

- Extends functionality of Systems Center Operations Manager 2007 and Audit Collection Services to maximize your investment.
- Saves money by creating a repeatable, organized, and automated reporting process.
- Eliminates painful processes of extracting raw data into security and compliance reports.
- Informs management and auditors with meaningful logistics on Windows infrastructure.

Report Summary			
Computer Domain:	HIBBSLAB	Computer:	DC1\$
Account Domain:	All	Account:	All
Event Source:	All	Event ID:	All
Category:	All	Event Type:	All
Start Date/Time:	9/19/2007 00:00	End Date/Time:	9/20/2007 23:59

ReportAdmin for ACS offers the ability to customize your reporting views for a more powerful way to analyze your ACS data and deeper insight.
