

FOR IMMEDIATE RELEASE

JurInnov Expands Ringtail® Legal™ Document Management Service Offering

Legal Technology Consulting Firm Leverages Extensive Product Knowledge and Experience to Provide Advanced Web-Based Litigation Document Management Solutions

CLEVELAND, OHIO – 17 December 2007 – JurInnov Ltd. (<http://www.jurinnov.com>), a legal technology consulting practice specializing in the management of electronically stored information (“ESI”), today announced the expansion of its hosted Ringtail® Legal™ web-based document management service offering for law firms, corporate legal departments and government agencies. The announcement marks an extension of an already existing relationship between JurInnov and FTI Consulting, Inc.. The company, one of the select Ringtail hosting partners of FTI Consulting, has hosted and managed large Ringtail document repositories on behalf of global corporations and law firms since 2001.

“Ringtail has proven to be a powerful document review technology for our clients as they manage large collections of data for legal, financial and administrative matters,” stated Timothy M. Opsitnick, JurInnov Senior Partner and General Counsel. “We are expanding our Ringtail hosting environment to meet and exceed the demand of our new and current clients for the ability to review and produce increasingly larger volumes of electronically stored information in the most efficient and effective manner possible.”

The primary focus of JurInnov’s expansion is the addition of a 150 terabyte Storage Area Network (“SAN”) device with a storage capacity exceeding 10 billion pages of processed electronic data. This expansion provides JurInnov with the flexibility to host and manage the large scale document review efforts that have become commonplace in today’s legal and financial matters. The SAN is housed in a secure enterprise-class data center along with the other hardware components of the Ringtail ASP environment. The addition of the SAN is currently being supplemented by server clustering, Network Attached Storage (“NAS”) devices and system redundancy to maximize performance and reliability.

“This investment exemplifies JurInnov’s dedication to continue to provide clients with a leading edge electronic document management solution,” said Tim Klinger, Managing Director at FTI Consulting.

“JurInnov’s enhanced infrastructure, devotion to client service and ongoing commitment to excellence allows them to successfully host and manage numerous multi-terabyte electronic data matters,” Klinger continued.

JurInnov is also implementing an interactive web-based 24/7 help desk solution to address client requests and project issues in a timely, efficient and automated manner. This growth is complimented by the development of a robust electronic discovery solution that seamlessly leverages JurInnov’s industry-leading data harvesting, analysis and processing services with the Ringtail technology’s powerful online document review capabilities.

About Ringtail® Legal™

Ringtail® Legal™ technology enables fast and efficient document review in over 200 languages – delivering substantial time and cost savings to attorneys and investigators working on large, complex matters. The web-based litigation support technology scales to handle hundreds of users, thousands of cases and millions of documents.
