INTERNATIONAL

(CFATS)
CHEMICAL FACILITY ANTI-TERRORISM STANDARDS
ASSESSMENT - EXPERTISE - SOLUTIONS

MISSION FIRST - CUSTOMER ALWAYS™

Covenant's chemical security expertise is uniquely positioned to maximize client efficiency in CFATS compliance through effective; preparation, implementation, and sustainment.

THE IMPACT OF CFATS

The U.S. Department of Homeland Security implementation of comprehensive chemical security regulatory regime under the CFATS Interim Final Rule (6 CFR Part 27) impacts sites containing chemicals at or above the Screening Threshold Quantities (STQs) of Chemicals of Interest (COI) listed in CFATS Appendix A.

High Risk chemical facilities are required to comply with a multi-step, specialized reporting regime known as Chemical Security Assessment Tools (CSATs). Additional requirements include effective application of Risk Based Performance Standards for security in accordance with a specialized Security Vulnerability Assessment (SVA) and with performance metrics delineated in a specialized Site Security Plan (SSP).

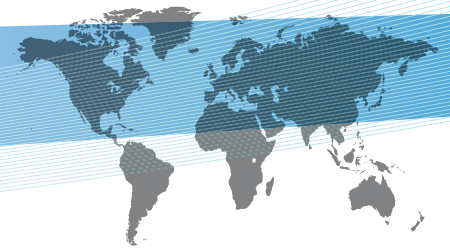

CFATS covered sites are subject to detailed inspection and audit regime as well as recurrent reporting requirements.

CFATS CONSULTANCY LEADERSHIP

Highly Experienced Critical Infrastructure Protection Personnel Includes:

Ms. Angela Williams-Tasky, CPP, is responsible for leadership and strategic direction as the Managing Director of CSI's Critical Infrastructure Protection (CIP) division. Prior to joining CSI, she provided pre-decision analysis and guidance to senior officials in both the Chemical Security Compliance Division (responsible for the Chemical Facility Anti-Terrorism Standards, CFATS) and the Protective Security Advisor Program within the Office of the Assistant Secretary for Infrastructure Protection of the Department of Homeland Security (DHS) during the initial stand-up and operational implementation phases.

Mr. Joe Trindal is responsible for operations and quality assurance as the Director of CSI's Critical Infrastructure Protection (CIP) division. Prior to CSI, he was the Special Agent in Charge of the Inspections & Enforcement Branch, Chemical Security Compliance Division, DHS. As the Branch Chief, he was instrumental in standing up the Office of Infrastructure Protection's Chemical Facility Anti-Terrorism Standards (CFATS) regulatory regime.

COMPREHENSIVE SOLUTIONS

Covenant provides comprehensive solutions in a cost effective manner.

PREPARATION

- CVI Information Management Compliance
- CSAT registration
- CFATS focused Records Management
- CFATS Coverage Mitigation & Inter-Regulatory Impact Analysis.

IMPLEMENTATION

- Chemical site initial screening questionnaire (Top-Screen)
- CSAT SVA Submission
- CSAT Site Security Plans (SSP)
- Alternative Security Plans (ASP)
- Site Specific RBPS Alternatives Analysis
- Preparation for Inspections
- Expert Consultation during DHS Inspections, Technical Assistance in Appeal Proceedings

SUSTAINMENT

- CFATS Training, CFATS Compliance for New Construction/Major Site Renovation Projects, Recurrent & Event Driven Sustained CSAT Reporting Compliance, Effective State/Local Emergency Mgt Coordination
- CFATS Focused Emergency Preparedness Planning & Exercise Consultation, Sustained CSAT Reporting Compliance, CFATS Prepared Guards and K-9 Services
- Client Specific CFATS Related Services on Demand.
