

October 1–4, 2008
Barcelona, Spain

THERAPEUTIC TEMPERATURE
MANAGEMENT CONGRESS

Cardiac Arrest and Beyond.

“Join us in Barcelona this October to learn why the use of mild therapeutic hypothermia is such an exciting and major breakthrough in the treatment of neurological injuries. Therapeutic temperature management should be a key aspect of care when treating patients with neurological injuries.”

– Kees Polderman, MD, PhD

Topics Include:

TBI, Stroke, Multi-Trauma,
Neonatal Encephalopathy,
Neuroprotective Treatments,
Infection, Cardiac Arrest,
and more!

OVERVIEW

The Therapeutic Temperature Management Congress (TTM Congress) is a prominent international meeting that brings together a panel of experts to examine current practices and research in therapeutic temperature management.

Attendees will leave this Congress with an understanding of the most current research, patient selection and management, disease processes and much more.

MEETING DATES

October 1–4, 2008

TARGET AUDIENCE

The TTM Congress target audience includes international and US physicians, academicians, clinical researchers, ER/ICU nurses, and other healthcare professionals involved in Therapeutic Temperature Management.

This program is directed toward healthcare professionals interested in reviewing the most recent clinical trial data and treatment through therapeutic hypothermia and temperature modulation.
