

FEATURES OF THE BYK BIKES – ERGONOMICALLY DESIGNED FOR CHILDREN

EASIER

Improved dynamics = as easy as ABC to learn and easier to ride

Smooth faster rolling tyres minimise the strain on kids' legs. Professional bike riders insist on this type of wheel. Easy riding and very robust, pedalling is a breeze. Compared to a wide-tired BMX type kids' bike with fat knobs which rides like a tractor, the taller more efficient wheels have a dynamic advantage over other brands making every kid on a ByK an Easy Rider.

LIGHTER

20% lighter weight Alloy frame and superior materials = greater efficiency & better manoeuvrability

Every ByK bike features an innovative alloy frame weighing under 1.2 kgs providing great manoeuvrability and ease of riding. The cutting-edge ergonomic design ensures a great fit and superb handling.

FASTER

Stability and balance = faster take-off and safer braking

Kids get a easier ride compared to other kids' bikes on the market because the ByK Bike is 20% lighter, and has more efficient wheels.

The ergonomic design features a low centre of gravity providing excellent stability and balance with the bike doing most of the hard work. Kids can take-off faster, brake quicker and maintain better control.

SAFER

Light and low with great control = a safer kids' bike

The ByK bike has superb and utterly dependable brakes. All hand brakes use premium alloy fittings which are child specific. Additionally all bikes have a coaster rear brake for simple and safe foot braking.

Central to the highest safety level ever is the low centre of gravity alloy frame. Sitting deeper into the taller wheels improves stability and control, this makes the bike very safe and easy to start and stop while cornering is really a breeze.

COOLER

Bold modern design, colourful and sleek = really cool bikes for cool kids

In bringing kids' bikes into a new generation all design components have undergone thorough testing. Many features in the latest adult bikes have been incorporated into the ByK Bike, from radial front spokes to custom sized ergonomic V bars. Cool kids will love riding the smart ByK bike with its clean colours, sleek patterns and WOW factor.
