Our Pioneering Technology Makes Your Job Easier

We were the first to offer a web-based search engine in the legal recruiting arena. And the first to build in unique coding — the ability to customize the database for your company, saved searches, mailing downloads and more. To meet ever-changing needs, however, we are constantly developing new and advanced functionalities for the database and search engine.

Providing constantly refreshed data, it gives you seven ways to search for and organize information

Attorney Reporting: Associate & Partner

Law Firm Report — Breaks down each law firm the Leopard List covers. It displays the number of attorneys in each practice area and specialty, as well as law school information for each location. The report is presented in an easy-to-use graph, allowing subscribers to ‘drill down’ to specific attorneys.

Law School Report — Reports on the number of attorneys at each firm by their law school degrees. Search by top 10, top 20, LLMS or by specific schools. Want to know who hires the most Harvard graduates? It’s simple, just run a Law School report. Or, run the same Law Firm School report but select “LLM” to display the number of attorneys at each firm that have this degree.

Practice Area Report — Displays the number of attorneys in each practice area by location. This lets you know which firms are building up or dismantling departments.

Specialty Report — Shows the number of attorneys for each specialty by location, allowing subscribers to ‘drill down’ to the specific associates at each firm.

Law Firm Comparison Report – Enables you to view firm department data side by side for easy comparison of practice areas, specialties, etc.

Law Firm Historical Report – Lets you track law firm departments over the past year to provide valuable insight into their business plans.

Practice Area Chart - Creates a graph of practice areas by percentage, generating a ‘visual’ makeup of each firm.

Status Code History - Now you can gain an overview of the entire system to see WHEN the most laterals were hired, and simply scroll down to see by who! Our status codes identify who is NEW, who is a LATERAL, who has LEFT the firm and now you can see when all those things occurred, quarter by quarter.

Status Code Comparison - This report allows you to select firms to compare side by side. See who hired the most new’s in the last quarter, or who hired the most Laterals overall. This report makes it easy to look important information.

Our reports have the ability to ‘drill down’ to the associates or partners represented in each report with a Leopard List subscription.

Job Reporting - Associate & Partner

Job By Region Report & Firm - Breaks down open jobs by each region of the country and Internationally by FIRM. It lists each law firm in the system, the total number of open jobs and the regions they are located. "Drill Down" to the jobs in any area where you have a subscription.

Job Report by Region and City - Gives you the total for the region, and then the total by CITY. You can quickly see which cities are seeing the most action and 'drill' down to jobs where ever you have a job search subscription.

Job by Practice Area - Reports on open jobs by individual practice area, lists the firms where the openings appear and the totals within all the regions.

Job by Firm - Enables you to get an overview of all open jobs in an individual firm. It lists jobs by Practice area and gives you the total number in each PA, along with the breakdown of openings by region.

Job Report by City Comparison - This report asks you to select cities to compare. If you just wish to see New York, DC and Boston, you can select those cities for a report.

CONTACT REPORTS - We keep tabs WEEKLY on the recruiting coordinators of each firm in the system. These 3 reports allow you to see contacts BY FIRM, REGION or IN TOTAL. These reports can be downloaded into EXCEL, TIFF or PDF file.

All of our reports have the ability to 'drill down' to jobs represented in each report with a Job Search subscription.

Below is a practice area report for jobs, listing all open 'Corporate' jobs within our system. A report that you can have access to, regardless of your subscription. Job reporting is FREE with any Job Search subscription.
