Streamline Your Shop's Workflow

A SOLUTION FOCUSED ON MANAGING SHOP OPERATIONS.

Efficiency. Productivity. Accountability. These are just a few of the benefits you will gain by implementing Collective Data's *collectiveShop* software system into the everyday routine of running your maintenance shop.

Through simple views for supervisors, technicians, and parts issue, the preventative maintenance and repair process flows in sync.

BENEFIT FROM HAVING:

- **The information you need to make better decisions and run a lean, efficient shop.**

- **System-based time tracking that gives you actual time spent on jobs.**

- **Powerful reporting tools for viewing trends and costs of the overall shop operation.**

- **Reduced labor time.**

- **Automated work order process for creating and closing much easier.**

- **The same flexibility as other Collective Data products, allowing you to customize the software to your specific needs as a shop.**

- **More effective parts distribution.**

- **Much more.**

Shop Supervisor

- **Supervisor View** allows you to see what is being worked on at any time.
- **Work Assignment View** for easy job assignment to multiple technicians based on workload.

Technician

- Simple **Technician View** reduces data input and allows your technicians to spend more time turning wrenches.

Parts Issue

- **Part Issue View** alerts parts employees that a job has been assigned and is waiting on parts. Parts can be gathered and made available for each job, reducing wait time and keeping items from being removed from inventory before they are needed.

Job Complete

- A paperless, efficient system.
- System-based time tracking over the life of the job.
- Track preventative vs repair work costs.
- Much more.
