

# TELESOFT SOLUTIONS OVERVIEW

Complete Telecom Expense Management in a Single Solution

## REDUCE HARD DOLLAR COSTS

Even though telecommunications and related network services account for 3 - 4% of annual expenditures, telecom expenses are the least understood and least managed, resulting in over billings, un-optimized spend, and unknown inventory. Telesoft solutions significantly reduce fixed and mobile telecom expenses by automating the Telecom Expense Management (TEM) lifecycle including procurement and provisioning, inventory management, invoice processing, usage and cost allocation, and reporting.

*"Telesoft gives us the power to **control spending, identify costs and lower our Telecom spending through improved management.**"*

- Top Transportation Provider

## TELESOFT TOTAL COST MANAGEMENT MADE EASY

The Telesoft Total Cost Management Suite provides an integrated management platform for both fixed and mobile services. Offered as a hosted, software licensed, or outsourced solution, you get total visibility into your telecom costs to reduce expenses.

### Telesoft Invoice Management:

## AN INTEGRATED PLATFORM SAVES YOU TIME AND MONEY

Built to meet the requirements and changing needs of organizations today, the Telesoft Total Cost Management Suite provides an integrated management platform for Telecom Expense Management of both fixed and mobile services.

**Integrated:** Manage invoices, usage, cost allocation, provisioning, inventory, and reporting for both fixed and mobile services from one platform to save time and money. Get centralized views of inventory for both fixed and mobile services. Leverage common data, such as cost center information, across modules.

**Modular:** The Modular Design of the software allows you to add other Telesoft modules – Invoice Management, Call Accounting, Mobility Management, or Asset Management – to grow with the needs of your organization.

**Scalable:** Designed for multiple locations and heavy volume traffic to meet the most demanding needs. Telesoft solutions process thousands of invoices each month in seconds. CD, EDI and other electronic formats from every vendor are mapped to the database for accurate and quick validation.

**Synchronized:** Automates and synchronizes the exchange between telecom vendor feeds, HR and Accounting to reduce time spent re-entering duplicate user data. Integration includes SAP, Oracle Financials, JD Edwards, PeopleSoft, Lawson, Great Plains, and more.

**Flexible:** Offered as a hosted, software licensed, or outsourced solution, you get total visibility into your telecom costs to reduce expenses.
