Introduction to Ultimate Destinyland™

The shared vision and mission of the individuals, cause-oriented companies and affiliated non-profit organizations that comprise Ultimate Destinyland is to help “Expand the Circle of Success” for all and to foster personal, organizational, community and planetary empowerment, enlightenment, consciousness and sustainability.

[Ultimate Destiny University](#) (UDU) is a non-profit Internet-based educational company that produces, publishes, markets and distributes materials designed to empower people, deepen spirituality, and awaken them to conscious, sustainable living. In actuality, UDU is a collection of intellectual properties consisting of domain names, websites, blogs, e-books, print books, e-courses, e-zines, membership programs, webinars, teleseminars, audio CDs, and video DVDs all created to awaken people to their potential.

It is also a set of strategic alliances and collaborations with retreat centers, coaches, consultants, non-profit organizations, and community development resource centers ranging from small non-profits to organizations as big and diverse as United Way, Rotary Clubs, Community Action Agencies, etc.

“Inherently, each one of us has the substance within to achieve whatever our goals and dreams define. What is missing from each of us is the training, education, knowledge and insight to utilize what we already have.” - Mark Twain

The world has changed greatly since Mark Twain's time, but individuals still dream and are searching for the training, education, knowledge and insight they need in record numbers. The personal and professional development field has grown to a \$210 billion industry and "wellness" is an industry poised to become the next trillion dollar industry according to experts.

[Ultimate Destiny Network, Inc.](#) is an international marketing and distribution company that helps individuals, organizations, and communities accomplish their goals and realize their dreams. The Company has created a business model that capitalizes on the latest approaches to on-line education, communication and marketing; synergistic alliances with other industry providers; as well as collaborations with key government and national nonprofit organizations.

How and where individuals find the knowledge and tools that will help them achieve their dreams depends upon their life orientation and circumstances.

- Some are seeking enlightenment, while others hope for success
- The priority may be a healthier lifestyle or spiritual fulfillment
- Many aspire to achieve their highest human potential, while others would be satisfied to reduce overwhelming debt
- Parents wonder how to help their children grow strong in their bodies, minds, and spirits
- Organizations wonder how to empower, motivate, reward and manage employees
- Communities seek resources and approaches that help create and sustain economic opportunities for all of its citizens and enable diverse populations to live and work in harmony.

As times change, the way people make their living also changes. The days of big, hierarchical industries with thousands of employees is passing. The nature of work and money has shifted. The development of Web 2.0 has flattened organizations. Millions of dollars in start-up capital and large tracts of real estate – along with tragic disruption of ecosystems – are no longer necessary.

People are waking up to climate change, the need for renewable energies, local and regional self-sufficiency, and a sustainable life. We are moving away from extracting millions of tons of resources and processing them in order to produce throw-away merchandise. Simplicity is what many seek. What is valued now is information; it can be shared, used to educate yourself, create a needed item, entertain, make decisions, or shift the focus of your consciousness.

Today, with a computer, a telephone, and a modem, it is now possible for people to launch and manage an empire from their living room and make a fortune. Internet-based collaborations and strategic alliances are the way of the future for all businesses. Ultimate Destiny is on the front edge of a wave of change that will change everything we once believed about how business is done and daily life is organized.

We refer to the structure of Ultimate Destinyland as a **strategic marketecture**™ because the company is based on strategic alliances in place and specific marketing outlets in operation. We currently have about 400 web and blog sites set up and are creating new ones daily. We have completed a number of e-books and print books, are in the process of recording the audio CDs and the DVDs.

We have the means to market not just our own books, music, CDs, and DVDs, but the work of thousands of other writers, artists, musicians, teachers, and creatives who create or teach easily but have no coherent marketing plan. This gives us a greatly increased array of products, and allows us to collaborate with them in ways that benefit all. We are planning to produce live events in Sedona, AZ and San Diego, CA with authors and trainers, getting rights to videotape them, and bringing them to a retreat center setting the next day for a small private workshop/intensive.

We have set up the [Ultimate Destiny Hall of Fame Award](#) that recognizes individuals who are living their ultimate destiny and encouraging others to do so. They receive a plaque and the Ultimate Destiny Success System, which consists of the 14 books, the audio CDs, a DVD, and links to our websites that will promote their activities as well as ours.

We have created *Empowerment Training and Mentoring Systems* that will be marketed through thousands of Community Economic Development Centers. We have a speaker's bureau that can connect speakers with those looking for one, and many of these speakers are interested in being recorded for audio and video, which will add to our audio video libraries.

We created [Expanding the Circle of Success](#) and an [Ultimate Fundraising Program](#) that allows us to partner with non-profit organizations. They help market our Ultimate Destiny Success System and in return receive a donation of 50% to 110% of our profits as a contribution for their help.

Our ultimate goal is to help create an international network of Community Empowerment Resource Centers that will support people in their efforts to shift their lives and adapt to the coming changes. These centers will license the Ultimate Destiny materials and courses, and use them to help people in their communities whether they are just starting a community, are working with an online "community of consciousness," or have been in community for years and want to go a step further, e.g. to create complementary currencies or a local food system. (See www.UltimateSuccessPuzzle.com).

Ultimate Destiny first grew out of the vision of [Charles Betterton](#), a Community Economic Development specialist and former Federal disaster relief director. The founding Board of Directors includes Charles Betterton in Sedona, AZ, and Merl Kellogg, Les Turner, and Audrey Turner, all in California. The lead authors of the Ultimate Destiny Success System include Betterton, Penny Kelly in Michigan, Howard Pepper in California, Kimberly Jace in Florida and Lorie King in Virginia.
