

PRESS RELEASE

MICORE SOLUTIONS HELPS INMED PARTNERSHIPS FOR CHILDREN TRANSITION TO GOOGLE APPS

INMED Partnerships for Children makes the transition from hosted Exchange to Google Apps

December 2, 2010 --RESTON, VA --MiCore Solutions announced today that it successfully helped INMED Partnerships for Children deploy Google Apps.

“As a global organization supporting children and families in the United States, the Caribbean, South America and Africa, we recognize the collaborative and translation capabilities of Google Apps as key to streamlining communication and reaching our employees in remote locations,” says Dr. Linda Pfeiffer, president and CEO of INMED Partnerships for Children. “With the improved communication capabilities Google Apps provides, we are able to better serve the communities we reach around the world.”

“It was exciting to see how quickly the INMED team embraced Google Apps and sought ways to leverage the Google platform. We look forward to continuing to work with INMED and help support their mission of helping children and inspiring hope for families and children around the globe,” says David Stout, vice president of MiCore Solutions.

About INMED Partnerships for Children

Since 1986, INMED Partnerships for Children has built alliances with public- and private-sector partners in more than 100 countries to rescue children from the immediate and irreversible harm of disease, hunger, abuse, neglect or violence, and to prepare them to shape a brighter future for themselves and the next generation.

Through a broad range of health, social, education, violence prevention and community development programs, INMED is helping to create opportunities that inspire hope, build self-reliance and encourage community collaboration to sustain positive change.
