

REDEFINING WELLNESS IN THE WORKPLACE

Our doctors come to you.

Kinetic Health Alternatives (KHA) sets a new standard in individual and corporate wellness through our on-site patient management systems, custom corporate packages, and support for a healthy, balanced lifestyle.

Health for Thought:

The average face time with a doctor is 3-5 minutes.
The average time with a KHA doctor is 15-30 minutes.

Mobile health care with a progressive approach.

KHA serves as a partner with our clients, providing on-site care and treatment as part of a progressive wellness program, with the overall goal of providing businesses and their employees a new level of benefits.

Health for Thought:

Typical waiting time for a doctor is 30-45 minutes.
KHA patients have no wait time and no waiting room.

On-site providers specializing in work-related aches and pains.

KINETIC HEALTH ALTERNATIVES is the next logical step, offering direct access to doctors specializing in the treatment and prevention of musculoskeletal pain and repetitive stress injuries.

Imagine the potential of a healthy team and the positive impact KHA will have on you and your business.

THE ISSUES AT HAND

- Pain is the most common symptom that prompts people to seek health care, but commitment to treatment options is often influenced by time and finances.
- On an annual basis, the average employee managing chronic musculoskeletal pain could potentially miss 10 to 20 workdays each year with a cost to American employers of \$61.2 billion dollars.
- Organizations succeed when the team is functioning at its best. In today's competitive marketplace, businesses everywhere are searching for methods to increase productivity and manage costs.

THE REMEDY

- KINETIC HEALTH ALTERNATIVES is changing the paradigm in which doctors and patients live in by doing what the industry doesn't.
- Our practitioners come to you, because we believe that your time is valuable, as is the investment it takes to nurture good health.
