

## Fitting a Square Peg into a Round Hole

Fitting a square peg into a round hole can be exhausting. Finding, evaluating and choosing the right document management solution can be exhausting, too. IT budgets have shrunk and continue to shrink; however, business challenges and objectives are still growing. Many employees are asked to do more with less and sometimes there just doesn't seem to be enough time in the day to get everything done—especially when it comes to software evaluations.

Distributed Compliance Solutions (DCS) understands that better than anybody. Our team of document management and compliance experts have years of experience installing, testing, and evaluating solutions to make sure that the right solution is selected and configured, for the right group, at the right price, and especially at the right time.

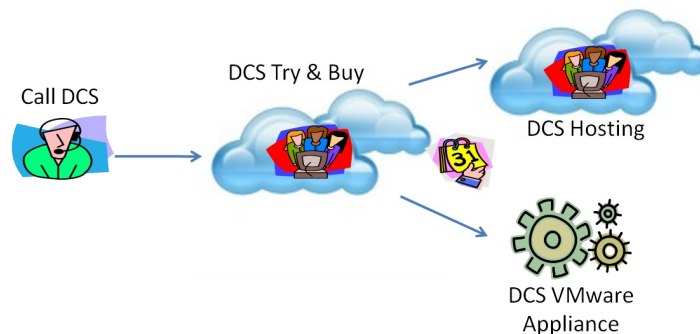

### DCS "Try and Buy" Solution is Right for You

That's why at DCS we've created a "Try and Buy" cloud solution for our customers. With the "Try and Buy" approach, the experts at DCS can help you fit that square peg into that round hole by changing the game with the document management software purchasing process. The "Try and Buy" offering encompasses pre-configured Documentum products running in the DCS SAS 70 Type II hosted environment for customer preview for up to thirty days. Once the thirty days is complete, the DCS VMware Appliance can be deployed to your site without any further DCS services or DCS can provide a monthly or yearly application hosting option for your Documentum implementation.

The DCS Try & Buy option is a low-cost, risk reducing option— whether you're interested in purchasing departmental or enterprise level software and need some time to evaluate the product or if you're considering an upgrade with your current solution. Getting started is as easy as 1-2-3.

1. Acquire Documentum 30 day evaluation seats.
2. Work with a DCS administrator to configure your test users.
3. Migrate sample content into the ready to use repository.

At the end of the "Try and Buy" you can either purchase the DCS SAS 70 Type II Hosting option for your Documentum implementation or purchase the DCS Documentum VMware Appliance image to install in your own environment. Additional DCS services can be provided if requested.

## Around-the-clock Monitoring and Management of Your Critical Content

Our hosting partner, Peak 10, provides 'state of the art' facilities. Each site provides highly skilled technical personnel, 24x7x365 and are engineered with multiple levels of security, uninterruptible power, redundant HVAC systems and fire suppression. Data backup solutions are included and disaster recovery services are available, including auto hot-site failover.

### Regulatory Compliance

The sites are SAS 70 Type II compliant. SAS 70, is an auditing statement issued by the Auditing Standards Board of the American Institute of Certified Public Accountants (AICPA). SAS 70 defines the professional standards used by a service auditor to assess the internal controls of a service organization and issue a service auditor's report. A Type II service auditor's report includes the service auditor's opinion on the fairness of the presentation of the service organization's description of controls that have been placed in operation and the suitability of the design of the controls along with the auditor's opinion on whether the specific controls were operating effectively during the period under review.

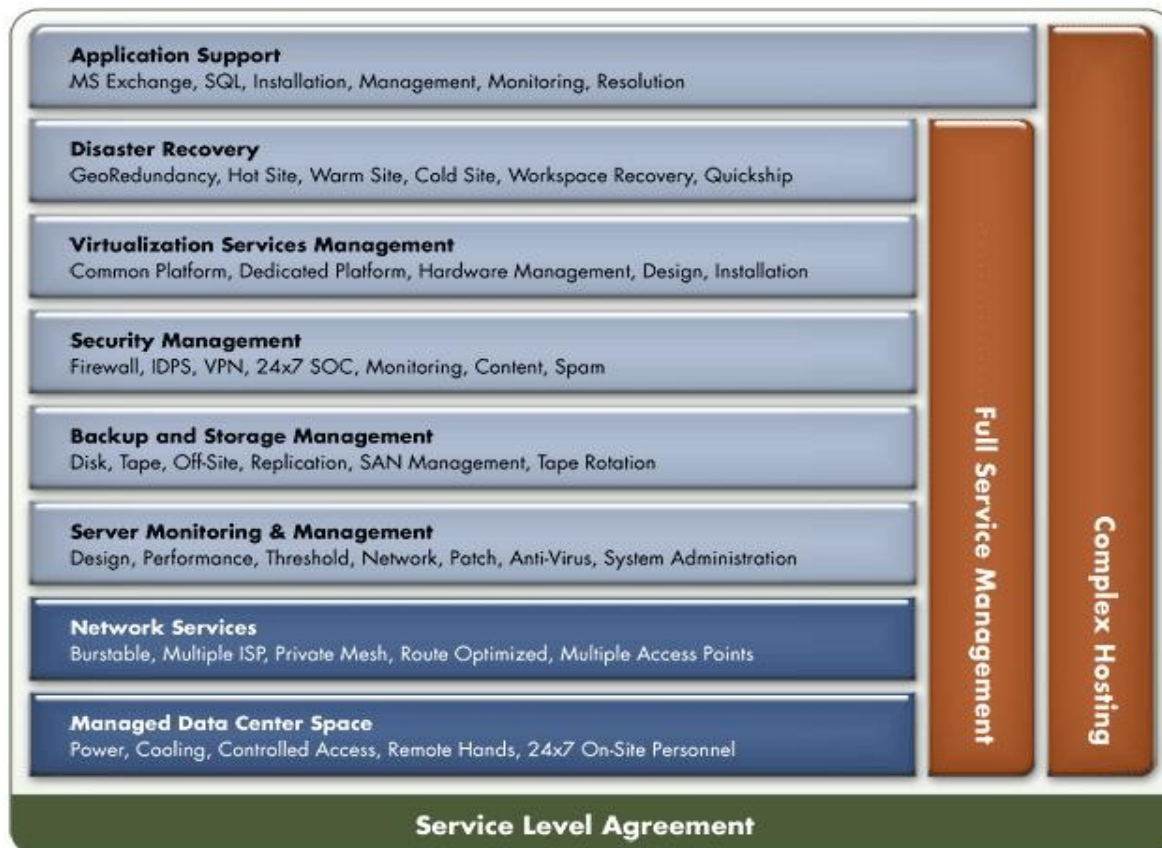

### The DCS Difference

Benefit from our extensive experience with Enterprise Content Management systems. Our services staff is lead by consultants who have helped deploy systems since 1998 in 15 countries and in 4 languages in tier one regulated enterprises. Combined this with a team approach and diversity, we make it possible to deploy and configure a validated/hardened hosted system based on best practices, with test reports supplied and end user training provided. Content backup is provided, as well as platform maintenance and change control.
