

QuickMedical Announces Medical Equipment Leasing Program

Leasing medical equipment makes sense.

At least 50% of medical equipment sold to physicians is leased. By matching the terms of the lease with the useful life of the equipment, your overall business plan is enhanced and strengthened. Quick Medical has recognized the need to offer hospitals, medical clinics, and other health care facilities the option of leasing new and/or additional medical equipment versus paying cash or long-term high interest rate financing.

What are the advantages in leasing medical equipment?

- **No down payment**
- **Fixed payments that will not change regardless of market conditions.**
- **Have the latest technology with a monthly payment you can afford.**
- **Receive a tax break, as described in the [IRS's Section 179](#).**
- **Payments that are lower than most conventional financing means.**
- **Leased equipment pays for itself via revenue generated.**
- **The savings realized by leasing your equipment can be used to further promote and market your practice/facility.**
- **Keeps your cash flow healthy by not requiring large down payments or cash reserves.**
