For every project need, we provide a wide range of standard and custom packaging options—from our patented flexible Lift Liner™ to standard or custom-designed durable containers.

Flexible packaging options include container liners, IBC bags, railcar liners, railcar and truck tarps, large component protective covers, Lift Liner™ packaging systems, and custom-sewn containment systems, to name just a few. Durable packaging options include standard or custom intermodal shipping containers, metal containers, drums, boxes, and any package required for shipping.

All of our packaging systems are supplied under our stringent Quality Assurance Program and are compliant with applicable federal regulations.

Contact an MHF Services Business Development Manager to see how our wide array of packaging options can meet your requirements.
