

# DIALOGUE WITH THE DEVIL

Enlightenment for the Unwilling

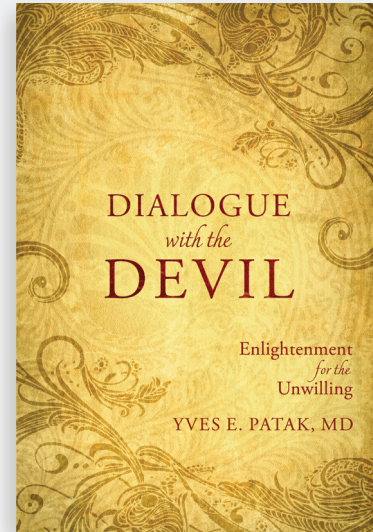

Yves Patak, M.D.

## Have we misunderstood the Devil?

*"Although I have been around for almost as long as your creator, even after two thousand years of Christendom people get me wrong, misinterpret, and demonize me on a global scale . . . but nobody ever understood me . . . Nobody comprehends my real role on this planet!"*

*Dialogue with the Devil* is a very unique book. For many centuries, human beings have been fascinated with a so-called supernatural being called by many names: Satan, Lucifer, a fallen angel, the Devil. Whether feared, worshipped, ignored, or discounted, there is no doubt that the devil has played a major role on the planet. But who is he? For the first time, he himself explains who he is, where he came from, and most importantly, what his "job" is on the earth, and in the scheme of the universe. Challenging, controversial, always fascinating . . . but never dull! This book will shake the foundations of many a belief system, and change the way we look at the Devil forever.

**YVES ETIENNE PATAK, MD** works as a general practitioner, acupuncturist (ASA), and hypnosis therapist in Zurich, Switzerland. Two of his novels have been published, *The Healer*, and his current project, the thriller, *The Screener*. Various stays in the Far East, India, Sri Lanka, and the West Indies brought him into contact with miscellaneous cultures, rites, tribal medicine, and superstition. All those experiences have strongly inspired Yves both in his work as a physician and writer.
