

SiteHawk VeriScan™

More Accurate and Efficient Chemical Inventories

Managing chemical compliance relies on accurate and efficient chemical inventories. Reducing human error and inaccuracies and accurately determining what chemicals are onsite, where they're located and how much is there, can seem impossible.

SiteHawk introduces VeriScan™, the advanced chemical inventory solution you've been searching for. Chemical inventory processes are streamlined and automated with barcode scanning software that seamlessly integrates with your SiteHawk MSDS notebook. Utilizing hand-held technology ensures that necessary information is collected and properly marked. Chemical inventory information, like quantities and location, is instantly merged with electronic notebooks and reports, helping you easily meet your compliance goals.

What's Your Vision?

- Faster, simpler, and more accurate chemical inventory processes
- Easier determination of material regulatory reporting thresholds
- Clear understanding of what materials are stored and used in each area
- Automatic reconciliation of physical inventory to your MSDS notebook
- Assurance that every chemical has a MSDS

INCLUDED FEATURES

- Mobile barcode scanning
- Real-time chemical location management
- Easy-to-use worksheet for matching chemical inventory results to your MSDS Notebook

“VeriScan™ puts the power of efficient chemical inventories in the palm of your hand, eliminating touch points and increasing accuracy.”
