- Plug and play connectivity
- Encrypted transmission
- Factory mated units – Invisible to other devices
- One year full replacement warranty
- FDA 510k & UL approved

TMI SPECTRE

Operation:

The SPECTRE wireless foot and hand switch system is designed for use with GE-OEC Series 9800 and Series 9900 Mobile C-Arms. Both the hand and foot switch function like the original wired foot switch and hand switch, but wirelessly. Unlike the OEM wired foot switch, the SPECTRE foot switch includes a "save" button.

Installation:

The SPECTRE is plug and play. Simply connect the SPECTRE receiver where your existing hand switch is connected and it's ready to operate. (See photo below)

Size:

Foot switch: 2.8 lbs. Dimensions: 12.5" x 8" x 2.25"
Hand switch: 4 oz. Dimensions: 5.8" x 2.3" x .85"
Receiver unit: 4.5" x 4.5" x 2"

Battery:

The UL approved lithium ion batteries included with the foot switch will operate continuously up to 40 hours on a charge. The foot switch recharges in 4 hours. The hand switch will operate continuously up to 15 hours and recharges in two hours.

Encrypted and paired for security, safety:

Upon power up the system scans 70 communications channels for current use and selects only those that are not in use. The transmissions are also fully encrypted and factory paired. The SPECTRE hand and foot switch will connect only with a paired receiver and are invisible to all other un-paired devices, insuring total data integrity and interference-free use.

The SPECTRE system uses the 2.4 GHz bandwidth which is outside of all the assigned hospital equipment frequency spectrums. The Spectre uses spread spectrum frequency hopping which selects 1 of 70 sub-channels in which to operate.

Spectre wireless receiver

Range:

Up to 50 feet

Hand Switch/Foot Switch:

The hand switch and foot switch perform the same functions: Fluoro on, Save, One shot, and Mode Select. A hand switch storage/charger is included.

Warranty:

- One year full replacement warranty.

TransAmerican Medical Imaging

TransAmerican Medical Imaging supplies the highest quality, pre-owned and remanufactured Philips, Picker, and GE-OEC parts and systems.

Our engineers and sales reps combine 100 plus years of industry experience guaranteeing you'll find the right part, at the right price, when you need it.

With an inventory of over 15,000 parts and systems, backed by the strongest warranty in the business, you have the confidence you're receiving the best components and service available.
