- Full Windows Operating System
- Integrated Numeric Keypad
- Optional QWERTY Keyboard
- Sunlight Readable 7" Display
- Bar Code / Credit Card Readers
- Vehicle Mounting
- Full Suite of Accessories

Ultra Mobile. Ultra Tough.

It's small. It's lightweight. And it's **rugged**. The versatile **xTablet® T7000** gives your mobile workers the best of all worlds. It offers the functionality of a notebook, the full Windows® operating system of a Tablet PC and the portability of a handheld device. The **xTablet® T7000** delivers significant memory and processing power advantages over traditional Windows® Mobile handhelds.

Rugged, reliable and built to withstand the harshest environments, the **xTablet® T7000** is IP65, MIL-STD 810G certified so your mission-critical information is safe, even if dropped, shocked, or exposed to other undesirable conditions.

Hot-swappable batteries, all-light readable 7" display and lightweight 2.5lb form factor keep mobile workers productive the whole day without fatigue. The Windows 7 Professional operating system runs full versions of your business and desktop applications providing even greater capacity to a mobile workforce.

More Functionality. More Revenue.

With an integrated numeric keypad and full QWERTY keyboard (option) you can capture valuable information to ensure better business decisions and provide increased customer service. Add a credit card reader and collect payment on-site, or sell additional products while at the customer's door. Optional GPS provides real-time status and location stampings and turn-by-turn directions to ensure mobile workers stay on track. Vehicle or desktop cradle, hand strap, carrying case, and two or four-point shoulder straps provide them with all the accessories they need to get the job done.

Speed Time to Deploy. Lower Total Cost.

The **xTablet® T7000** also speeds development and deployment, reduces downtime, and repair and replacement costs over consumer-grade devices. This significantly lowers IT support and your total cost of ownership.
