

EcoSafe®~6400™ Compostable Can Liners

Reduce the amount of plastic that ends up in landfills by choosing EcoSafe~6400 trash can liners, the environmentally-friendly, compostable choice for disposing of organic or other waste.

It takes normal plastic bags over a thousand years to degrade in a landfill, but EcoSafe~6400 can liners will do so in just 45 days in a municipal or commercial composting facility.

Ideal for the collection of pre and post consumer food waste, they also support municipal curbside yard waste collection programs. Unlike trash bags that are designed to be carried, can liners are meant to be filled, tied and then dumped. This allows a lower gauge of materials to be used. With a .85 ml thickness these liners still have superior puncture and tear resistance and are guaranteed to hold up to 50 lbs. Their anti-zipping quality prevents them from 'running' in the event the liner is punctured or torn, a common problem with many compostable liners and bags.

Tough on trash, easy on the environment.

- **Unique star-seal bottom prevents leaks**
- **Heat resistant to stand up against scolding hot foods**
- **Controls odor and dissipates moisture**
- **Leaves no chemical residue behind after biodegradation**
- **Certified 100% Compostable by BPI and ASTM D6400**

EcoSafe® Can Liners

Item #	Description	Inner Pack	Case Pack
351-81717	2.5 gal. (17 x 17")	20/30	600
351-82432	13 gal. (24 x 32")	24/12	288
351-83042	33 gal. (30 x 42")	9/15	135
351-83348	39 gal. (33 x 48")	6/15	90
351-83550	45 gal. (35 x 50")	8/10	80

Item #	Description	Inner Pack	Case Pack
*351-83955	48 gal. (39 x 55")	8/10	80
*351-84248	55 gal. (42 x 48")	8/10	80
351-84860	64 gal. (48 x 60")	6/10	60
351-85460	96 gal. (54 x 60")	6/10	60
