Are you considering a cloud version of your software?

Most EHR software providers have seen a 15-50% increase in demand for an off-premise cloud subscription solution. How will you address this opportunity?

ClearDATA has already cloud-enabled many leading EMR and other healthcare solutions which are hosted on our Healthcare Cloud Platform*. These solutions are now being offered in our highly secure, HIPAA-compliant, private cloud network to clients ranging from single provider practices to some of the nation's largest hospital networks. We can quickly and cost-effectively provide your company with a SaaS-like product without you having to spend several man years and millions of R&D dollars.

ClearDATA's partners are experiencing **increased revenue** and **rapid market penetration** by offering their clients an alternative to expensive on-premise, self-hosted solutions. A secure, cloud-hosted solution provides your clients with a low cost monthly subscription model, a high level of security, reduced risk of breach, and anywhere anytime access. Both you and your customers can immediately begin receiving the substantial benefits of our healthcare cloud platform as a service.

- **Faster deployment times, rapid time-to-revenue** – one day vs. weeks or months to implement. No need to order hardware, coordinate with VARs and IT support companies
- **Reduce support costs through centralized updates** – ClearDATA can provide upgrades, patches, maintenance, etc.
- **Customers have 100% uptime** – our healthcare cloud platform has multiple failovers and guarantees “always-on” availability
- **Increased performance through our state-of-the-art equipment and processing power** - 20-45% real-world improvement testimonials
- **No noticeable latency** – we manage and test the bandwidth and can provide a dual connection router to ensure full redundancy
- **Reduced upfront costs for customers** – lower IT costs by as much as 20-50%
- **Ensure client and patient data protection** – unique 3-tier authentication and standard backup services included with disaster recovery options

ClearDATA offers its partners and their clients professional services related to information security and privacy. We can provide Security Risk Assessment (SRA) services required for your client to achieve Meaningful Use. The SRA generates an additional revenue share opportunity with you, but more importantly, it creates a deeper trusted business relationship with your customer.

ClearDATA is the industry leading, healthcare-exclusive cloud hosting and information security company.

- Our experts fully understand your customer's business and technology challenges and goals
- Our security experts can consult with your team on ways to improve HIPAA compliance for your products and solutions
- We can provide you with Software-as-a-Service, Platform-as-a-Service and Infrastructure-as-a-Service
- We will professionally train and support your sales staff and drive marketing programs behind this offer

If your customers are asking you about off-premise, cloud or SaaS solutions, we can help by working with you to enable your software in the cloud cost effectively.
