There is only one

UserSafe™ Wi-Fi

Wi-Fi That Supports **More Than Internet...**

- **Energy Management**

Residential properties and hotels can control and monitor their energy usage, allowing them to save money on utilities, earn LEED points and decrease their carbon footprint.

- **Building Automation**

A Spot On Wi-Fi Backbone supports Home Control technology, allowing residents to control lighting, home security, appliances, temperature, home theater, audio and more from their favorite Wi-Fi devices!

- **Security Monitoring**

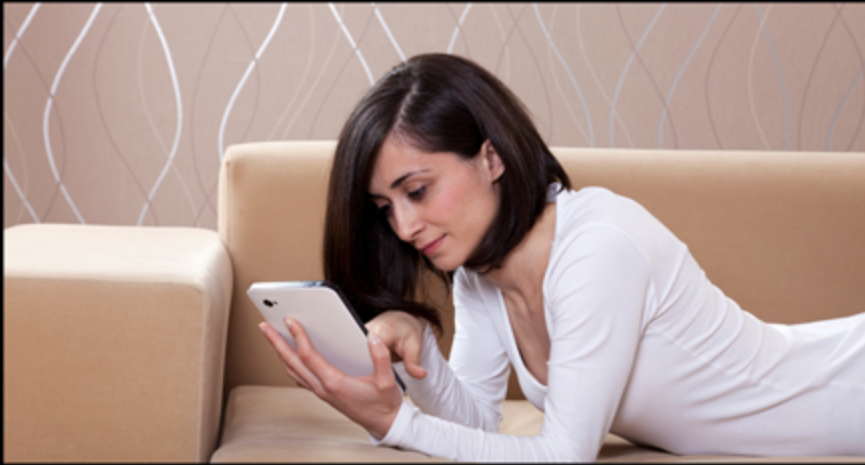

A Spot On Wi-Fi Backbone allows for the latest in security monitoring technology without the need for installing expensive and complicated wired systems.
