

Case Study Category: Dog Facility

Project Details:

Staff at Guide Dogs of the Desert International breed, raise and train certified guide dogs to give the blind life-changing independence. GDDI frequently hosts its clients for on-site training with the dogs to maximize the learning experience and foster the developing partnership. Training requirements and hungry rabbits left the facility with a dusty lot. The hot, dry dirt created a harsh environment for the staff, dogs and clientele.

Installation Date:

May 2007

Amount Used:

• 2,830 square feet

Solution:

Three thousand square feet of EasyTurf eliminated the dirt in the kennels and around the office and dormitories. The superior, synthetic grass gave the dogs a clean, comfortable environment to train and play. With the installation of an EasyTurf synthetic lawn these areas now provide an oasis for the GDDI staff, dogs and clients.

Testimonial:

“Our organization is in an area where grass doesn’t grow very well because of our visiting rabbits. EasyTurf has been a great alternative for us. We have an average of 20 dogs on the play yard grass, on any given day, and it holds up to their daily grind. They roll and play on the EasyTurf as it was normal grass. The drainage system is good and it has also held up well to our weekly disinfecting. We repeatedly get comments from visitors about how great it looks.”

-Kim M. Laidlaw, Director of Public Relations
