

eFolder Continuity Cloud Free Trial Program

eFolder partners and prospective partners are invited to a free trial of the eFolder Continuity Cloud. The eFolder Continuity Cloud is a wholesale, add-on service that allows fast recovery in the cloud on an emergency or as-needed basis. The eFolder Continuity Cloud is the only cloud recovery service that supports both ShadowProtect and AppAssure image recovery from a single cloud services provider.

The Continuity Cloud Free Trial Program includes:

- **No cost** Access for your organization is completely free for six full calendar days.
- **Fully featured** eFolder provisions a Continuity Cloud Medium Node, which includes all the available production-level features and includes capacity for multiple client test recoveries.
- **Outstanding support** Train up your technical staff with this live demo environment, while relying on the outstanding eFolder technical support when you need it.

**To get started, contact your eFolder Account Manager
at 1-800-352-0248 extension 1.**

Terms and Conditions: Demo nodes are available on a first come, first served basis. eFolder maintains a limited amount of demo capacity explicitly for partner trials and training; this is a finite resource. If a node is not available upon request, the partner will be offered a node in the next available demo window. Nodes are provisioned for six calendar days, from 12:01 AM ET on Tuesday to 12:00 AM ET on Monday. Demo environments are deleted at the end of the trial period without exception.
