

Product Suite

A Suite of Cloud-Based Applications that Helps You Execute Smarter, Faster, and Better

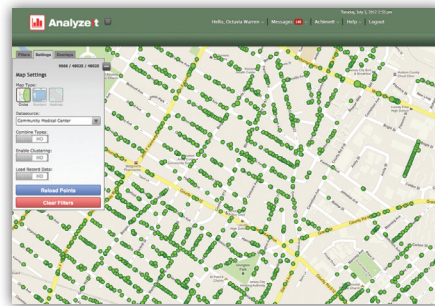

Whether you are a small organization with fewer than 100 employees or a national company with facilities from coast to coast, developing and executing strategies that will turn vision into reality is of critical importance. Plan poorly, and you are likely to be crushed by market forces. Execute poorly, and it's more of the same. But what if you could harness some powerful tools that enable you to execute smarter, faster, and better than your competitors? Well, now you can.

Execute faster with Executelt using tools to drive collaboration, accountability, and execution.

Executelt

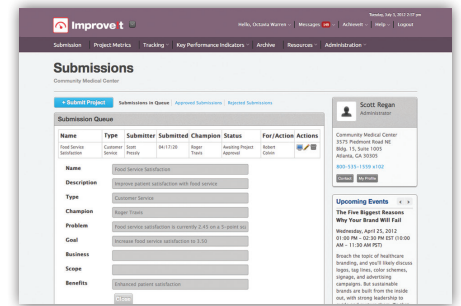

Our core application, Executelt, guides you through our proven Execution Flywheel that has generated breakthrough results for our clients. It contains a full suite of tools that shortens the planning cycle, enables strategic decision-making, and powers accountability and execution. No other cloud-based application guides you through the entire strategy development and execution management lifecycle with such focused precision.

Execute smarter with Analyzelt by visualizing your data, before focusing your strategy discussions through point-and-click analytics.

Analyzelt

Analyzelt is a revolutionary decision support application that combines robust data mapping capabilities with point-and-click data analytics. Filter your data, plot the results at an address level, and conduct analysis on the fly – on demand and in minutes. Through this unique combination of data mapping and data analytics, you can focus your strategy and zero in on a results-driven plan of action that you can execute immediately.

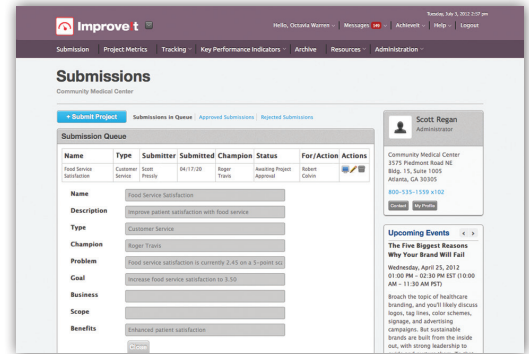

Execute better with Improvelt by launching, monitoring, and tracking performance and quality improvement projects online.

Improvelt

Elevating your quality and performance improvement system to achieve faster and better results is the singular focus of Improvelt. Create organizational transparency by managing your entire quality and performance improvement program in the cloud, where you can track project deliverables, performance, and outcomes. Drive organizational effectiveness and efficiency through better project oversight.

Features and Benefits Snapshot

- **A complete strategy development toolkit** to identify consensus thinking among your management team, employees, and key stakeholders.
- **A proven methodology** for developing, managing, monitoring, and executing plans of all types.
- **Easily track performance** with execution and engagement scores, scorecards, and real-time dashboards that feature historical trend lines.
- **Map any type of data** at an address level to see and understand the geographic distribution of customers, stakeholders, and more.
- **Stratifying your databases** as needed is as simple as a single mouse click, allowing you to display the map that provides the most value.
- **Easily filter your data** by any of your database fields, which are customizable and controlled by you.
- **Electronically submit projects** using your submission criteria, including approval routing, as well as required and optional information.
- **Select from customizable improvement methodologies** (Focus PDSA, Six Sigma DMAIC, Six Sigma DMADV, Lean Rapid Improvement Event, and Lean 6S Event) and automatically load the project deliverables and dates into the work plan.
- **Follow each project** through its various phases to chart progress, and easily view the status of every open project, along with current results.

Seamless Application Integration

Although all three modules – Executelt, Analyzelt, and Improvelt – provide substantial benefits as stand-alone applications, their power is magnified when used together:

Transfer findings from Analyzelt directly to your Executelt SWOT Analysis. Through this unique sharing of strategic business intelligence, you will be able to focus strategy and operational decisions, enabling you to execute smarter.

Launch projects in Improvelt directly from Executelt. Simply click the Improvelt submission button for any strategy to move it directly into the Improvelt approval process.

Mirror key performance indicators in Executelt and Improvelt. Just create a key performance indicator in one application and it automatically displays in the other application, keeping both your strategy team and your quality and performance improvement team in sync.

About Achievelt

Achievelt provides organizations with the tools and resources needed to develop strategy and drive execution. Our singular purpose is to help organizations execute smarter, faster, and better, and our cloud-based software, coupled with an array of organizational assessments, allows you to reduce the time required to achieve real, meaningful results. Our combination of technology firepower and human brainpower forms a powerful catalyst for organizational transformation, enabling you to turn vision into success.
