

ImproveIt

Accelerate Execution and Performance with ImproveIt

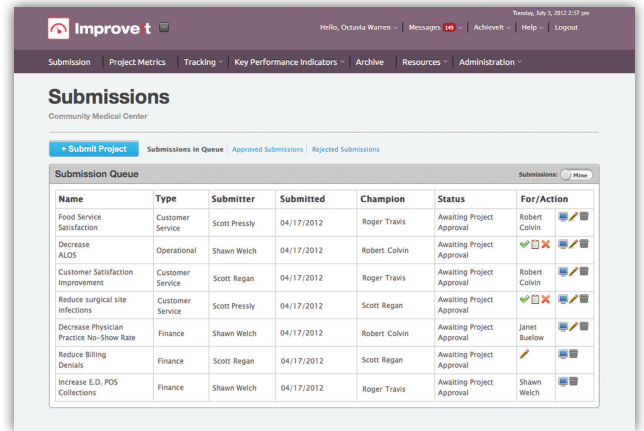

For most organizations, a core strategic and operational imperative is to increase effectiveness and efficiency, which subsequently allows for enhanced operating margins, more satisfied customers, and increased market share. Despite this intense focus on quality and performance improvement, the results of such efforts have often failed to live up to expectations, simply because managing an organization-wide improvement program has been difficult and cumbersome. Until now.

Better Execution Leads to Better Results

Today's market requires all organizations to develop a culture of continuous quality and performance improvement. Succeed, and you distance yourself from your competitors. Fail, and you waste not only organizational resources, but also human energy and creativity – which can be crippling. Now, with our cloud technology, you no longer have to worry about whether your PI projects are on time or on target. From project submission to project tracking to project execution, everything is online, transparent, and accessible by everyone in your organization. Our Baldrige-compliant application will help you complete projects faster with better results that are sustainable over time.

Manage Resources, Projects, and Accountability

Everyone in your organization will benefit from the customizable tools, workflows, project plans, alerts, and reminders that ImproveIt generates. Whether managing your human resources (put limits on the number of projects any person can be assigned to), project work plans (make specific project steps mandatory to ensure improved results), or key performance indicators (track your most important organizational metrics and receive alerts when they are out of compliance), driving collaboration, accountability, and execution is easier than ever before. And with the ability to customize all electronic forms and project methodologies, seamless organizational integration is ensured.

Name	Type	Submitter	Submitted	Champion	Status	For/Action
Food Service Satisfaction	Customer Service	Scott Pressly	04/17/2012	Roger Trais	Awaiting Project Approval	Robert Colvin
Decrease ALOS	Operational	Shawn Welch	04/17/2012	Robert Colvin	Awaiting Project Approval	
Customer Satisfaction Improvement	Customer Service	Scott Regan	04/17/2012	Roger Trais	Awaiting Project Approval	Robert Colvin
Reduce surgical site infections	Customer Service	Scott Pressly	04/17/2012	Scott Regan	Awaiting Project Approval	
Decrease Physician Practice No-Show Rate	Finance	Shawn Welch	04/17/2012	Robert Colvin	Awaiting Project Approval	Janet Buelow
Reduce Billing Denials	Finance	Scott Regan	04/17/2012	Scott Regan	Awaiting Project Approval	
Increase E.D. POS Collections	Finance	Shawn Welch	04/17/2012	Roger Trais	Awaiting Project Approval	Shawn Welch

Submit and launch projects online using customizable forms that follow project-specific approval work flows.

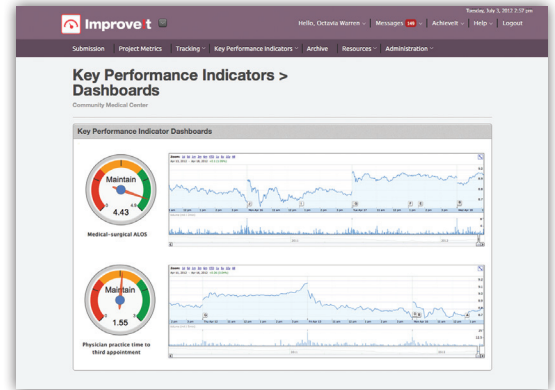

The cost of poor quality has been proven to range from 5% to 30% of gross revenues for most companies.

- Quality Digest

Features and Benefits Snapshot

ImproveIt enables organizations to manage and track every aspect of their quality and performance improvement program, from project submission to project execution to project tracking. Key capabilities include:

- **Electronically submit projects** using your submission criteria, including approval routing, as well as required and optional information.
- **Select from customizable improvement methodologies** (Focus PDSA, Six Sigma DMAIC, Six Sigma DMADV, Lean Rapid Improvement Event, and Lean 6S Event) and automatically load the project deliverables and dates into the work plan.
- **Create custom methodologies** for your department, division, or organization.
- **Determine project requirements** and track whether – and when – they have been met, while tying mandatory deliverables to the scheduling of project reviews.
- **Follow each project** through its various phases to chart progress, and easily view the status of every open project, along with current results.
- **Track key performance indicators**, as well as project metrics currently being pursued by active project teams.
- **Never lose a project file again** by automatically archiving closed projects in a searchable knowledgebase that provides a growing and ready resource library for future use.
- **Reopen projects** at any time with a click of a mouse.
- **Create resource rules**, such as how many open projects a person may serve on at one time, or the qualifications for facilitating or leading a team.
- **Create rules for project charters** that must be adhered to by everyone in the organization.
- **Coordinate activities** with organization-wide calendaring and communication tools.
- **Seamlessly integrate with Executelt**, which allows you to launch projects directly from our strategy development and execution application while also cross-referencing KPI tracking in both modules.

Track the performance of key performance indicators with real-time dashboards featuring historical trend lines.
