

LEXACOM 3

DO MORE WITH DIGITAL DICTATION

Lexacom 3 offers maximum efficiency, control and flexibility when dictating, transcribing and reviewing documents.

Lexacom Digital Dictation software can improve admin efficiency by up to 50% compared with analogue systems, and our flexibility and customer service support sets us apart from other digital providers.

As the only provider to offer secure, cloud technology for both its mobile apps and multi-site communications, Lexacom can be trusted to protect confidential information.

1-2-3

Easy to install and use

It will only take one of our technician a matter of minutes to install your L3 software and hardware. The software is intuitive to use so minimal training is needed.

Genuine Cloud solution

Securely dictate and review documents, whenever and wherever you like, using our encrypted cloud technology. This gives you ultimate freedom and flexibility.

Big cost savings on admin time

Our audits show that Lexacom can improve efficiency by 50% compared with analogue dictation systems.

Software evolves with workplace system requirements

The modern working environment is constantly evolving. Whatever changes you make to your workflow routine, Lexacom 3 can be configured to work with them.

Scalability – suitable for small or large organisations

It doesn't matter how big or small your workplace is. With a few simple adjustments, our software will perform to the highest standard in single or multi-site organisations.

Secure communication platform

All communication is encrypted and Lexacom 3 conforms to the highest possible security standards, whether you're dictating at your desk or on the move.

Management and reporting

Lexacom 3 provides full workload visibility. Outputs can be tracked and audited for efficiency and trends and reports can be tailored to individual requirements.

Widespread compatibility and integration with 3rd party systems

Lexacom 3 integrates with most major databases and other business management systems.

Proven to deliver huge increases in productivity

By having complete visibility of workload and productivity, no time is unnecessarily wasted and tasks are handled promptly.
