

Total Server Management

Run your business, not your servers!

When you put the Total Server Solutions team to work for you, you get our years of experience and precision standing behind your operation.

Since 2005, we have been helping server owners and hosting companies, just like yours, keep their servers up and running at peak performance. Our team is fast, meticulous, and versatile. Total Server Solutions offers everything you need to keep your operations running strong. From fully managed servers, colocation, individual services, server management, and custom solutions, we've got the knowledge and experience to keep your business up to speed.

Monitoring

Total Server Solutions continually monitors your server to make sure it's running at peak performance. We use highly customized, comprehensive tools to monitor all the services needed by a webserver.

If there is a problem, we get it taken care of right away. Here's some of what we monitor on a perpetual basis: FTP, SSH, E-Mail, DNS, HTTP, POP3, IMAP, Disk space on /, Disk space on /tmp and Server Load.

Hardening

You've got a server. You set it up yourself and it's running smoothly. But you're not sure if it's properly secured. You want to keep malicious hackers and spammers out. The vast majority of operating systems and even most control panels don't secure a server anywhere near as completely as they should. That's where we come in.

Optimization

We can get your server running at peak performance in no time. Our team of optimization experts will wring every last bit of performance from your server to get running just how you want it, fast! We'll check for all common problems that may be adversely affecting how your is running.

Trust Total Server Solutions

The tech gurus at Total Server Solutions possess a simply amazing depth of knowledge that we will put to work for you absolutely any time you need it. We wouldn't tolerate bad service, and neither should you. Our executive management team is passionate about customer service and making sure you are treated like royalty.

The Total Server Solutions team is extremely detail oriented. We want to make 100% certain that we always fulfill your needs with complete accuracy. Our team strives for quick response times to keep you up and running at your peak. The technical experts at TSS have years of experience to put to work for you. Give us a try, you'll be glad you did!

"Total Server Solutions has been the most on the ball Server Management company we have ever worked with."
