

# SELLING OR RECYCLING YOUR GOLD?

**KMG • GOLD**<sup>®</sup>  
gold • silver • platinum

**NORTH AMERICA'S GOLD BUYER SINCE 2007**

The ONLY Trusted Source To Recycle Your Precious Metals  
Friendly, Award Winning Honesty, Completely Transparent

# ABOUT KMG GOLD

Co-founded in 2007 by Michael Gupton, a graduate Civil Engineer, published author and registered prospector; and Karen Handford, a Certified Engineering Technician, KMG Gold is recognized as Canada's leading authority on recycling gold and silver jewellery and other precious metals.

Because KMG Gold Recycling is a functioning refinery and not a middleman gold buyer, KMG Gold is able to pay more to consumers and businesses wanting to recycle their scrap or unwanted precious metals. CBC News has confirmed KMG Gold's payout rates are the highest.

KMG Gold has been recognized for advocating on behalf of the consumer and for pushing for more transparency in the marketplace through public education. The KMG Gold website has become a valuable resource for those wanting to learn more about the industry.

KMG Gold is also the only company in the industry to receive multiple BBB Awards for ethics, integrity and honesty in the workplace.

*Excellence, Ethics, and Integrity in Business*

# GOLD BUYER FACTS

All recycled precious metal, including gold, silver and platinum, ultimately ends up at a refinery for processing. What that means is that everyone receives more money for their precious metals, by dealing directly with the refinery. Selling to anyone other than a refinery means less money in your pocket.

So whether you're a first-timer selling a gold ring inherited from your grandmother, or a

professional dentist, jeweller, coin dealer or pawn shop owner, make sure you get the most money for your gold, silver and other precious metals by dealing directly with the refinery.

The KMG Gold Refinery serves the business community, industry and the general public

*KMG Gold is a BBB Award Winner for Marketplace*

- **Holding all customer information in the strictest confidence**
- **Supporting international best business practices with respect to the environment**
- **Educating the consumer**
- **State Of The Art Technology**

# WHY RECYCLE GOLD?

## **Recycle Your Gold at KMG Gold Recycling**

Most people aren't familiar with the devastating impact mining for gold has on the environment. They are unaware that mining only 1 oz of gold can generate 400 tons of acidic waste rock and that when that waste rock is exposed to the atmosphere, it creates sulphuric acid. The acid created then leaches into the water table and can continue to do so for hundreds of years. To put the size of this problem in the proper perspective, many mine tailing dumps are so significant in size that they can be seen from space.

# HOW YOU CAN HELP?

Every ounce of gold that is recycled back into the market substantially reduces the creation of acidic rock waste and lessens the terrible impact that waste has on the environment.

Abandoned Gold Mine – Bissett Canada

**Help Us Do More To Protect Our Environment!  
Recycle Your Precious Metals at KMG Gold Recycling.**

Since 2007, KMG Gold Customers Have Helped Reduce The Creation of Acidic Waste Rock By More Than 2,000,000 Tons.
