Photography Computer Workflow Solutions

Improved Workflow with Tethered Photography

Directly tethering your camera to your computer can greatly increase productivity, decrease post processing time, & provide instant results.

The Air Flow Tech Table *by Savage* was specifically designed for enhancing workflow efficiency for photographers tethered to their laptop, both on site, or in the studio. The Air Flow Tech Table system provides a stable base for any laptop to be securely used, for extended lengths of time. With over 45 ventilated slots, and high-grade aluminum construction, the Air Flow Tech Table rapidly disperses any heat generated from laptops and batteries to provide longer laptop use, without danger of overheating. A cool, smooth running computer means a more efficient photo shoot. *Every Air Flow Tech Table Includes: Durable Carry Bag & Laptop Secure Strap.*
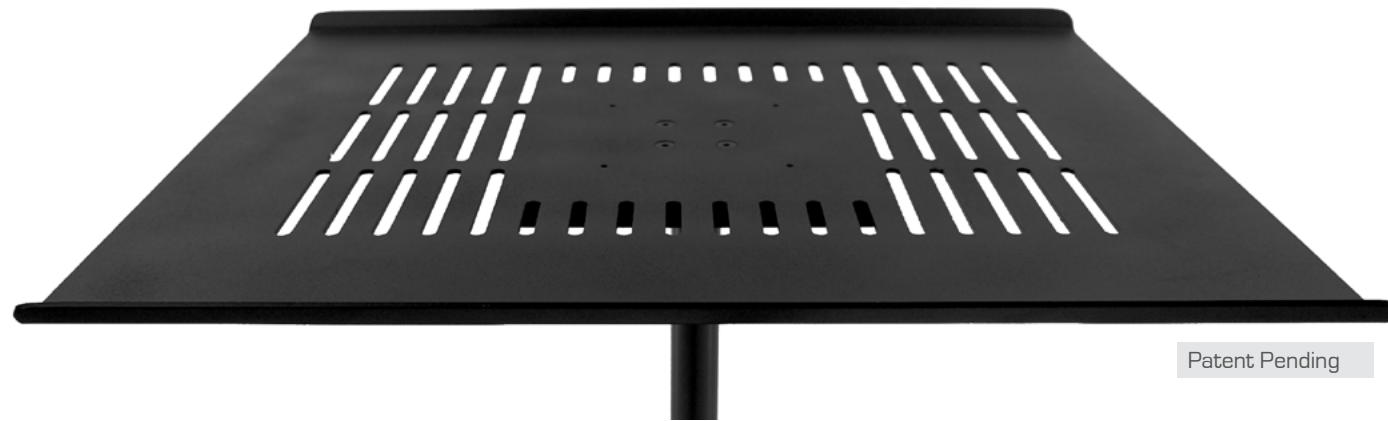

Patent Pending

Cool by Design

High Grade Aluminum Naturally Draws Heat Away From Laptop via Thermal Conduction

Maximized Aluminum Surface Area Provides More Effective Cooling

Ventilation Slots Allow Heat Generated from Laptops to Quickly Escape into Environment

Features

Velcro Laptop Secure Strap Firmly Anchors any Laptop to the Air Flow Tech Table

Over 45 Ventilated Slots Allow for Maximum Heat Dispersal

Easily Mounts to any Standard Tripod or Light Stand with Attached Universal Mount Plate

Extremely Durable, Matte Black, Scratch Resistant Finish

Modular "Snap In" Design Allows for Easy Install of Multiple Accessories

Air Flow Tech Table	Part Num.
Tech Table - 14"x16" *(35.5cm x 40.6cm)*	TT1416
Tech Table - 15.75"x18.5" *(40cm x 46.9cm)*	TT1518

The Air Flow Tech Table was designed with versatility and workflow productivity in mind. With a wide variety of accessories, users can customize each Air Flow Tech Table to suit their individual needs to maximize productivity on every project. All accessories are made of quality materials and are very easy to install. Most require no tools and easily "snap" into place.

Wall Mounted Tech Tables
Stationary Workflow Solutions

The Compact Mount Monitor Arms and Laptop Combo feature lift-and-pivot technology which allows the user to effortlessly position the height of the monitor without handles or tools. The 24" *(61cm)* arm will allow users extended reach as well as the ability to easily fold back the arm when not in use. Cables are guided along the underside of the arm for a clutter-free work area. Lift-and-pivot motion technology allows the monitor to be re-positioned with smooth effortless movement.

• For use with an external keyboard and mouse
• Position the laptop screen for maximum ergonomic comfort.
• Arm and laptop tray creates a dual screen configuration
• 13" *(33cm)* height range. Fits laptops 12.1" - 15.4" *(30.7cm x 39.1cm)* diag.
• Adjustable security brackets keep laptop in place
• Front-mounted handle for easy adjustments
• Maximum weight (laptop or monitor): 7 lbs. *(3.2kg)*
