

FormJet® Enterprise

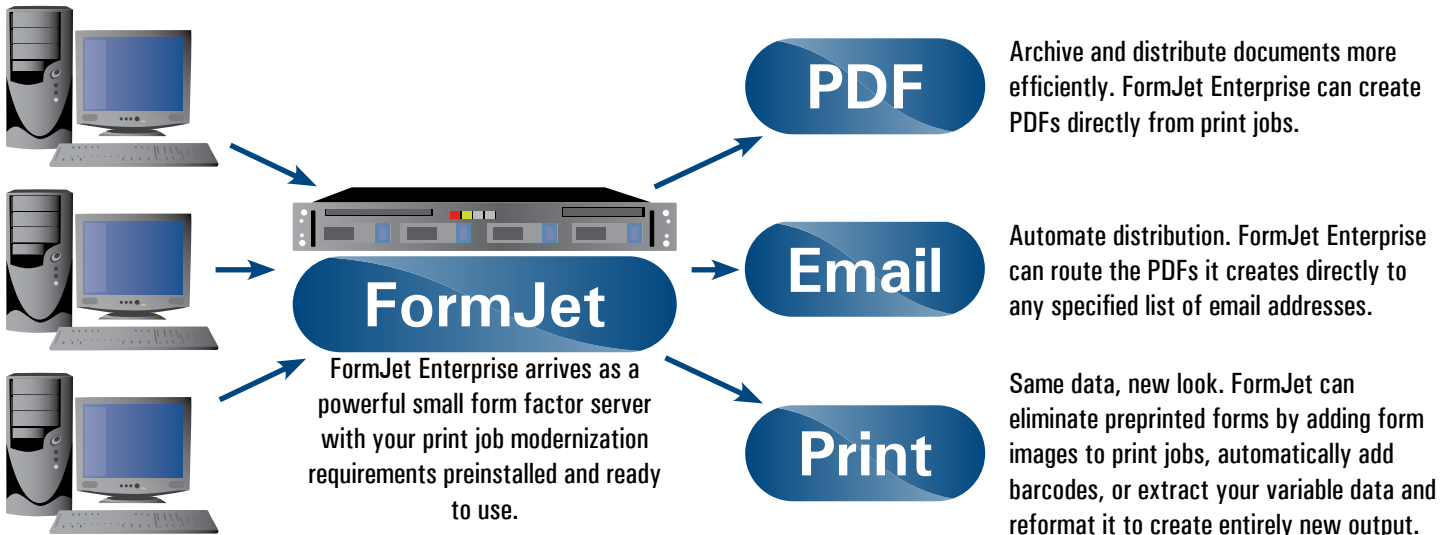

On-the-Fly Print Capture and Reformatting

- ✓ PDF Archive
- ✓ Document Email
- ✓ Forms Transformation

FormJet Enterprise appears on your corporate network as one or more printers to which client systems can send their print jobs. FormJet reprocesses these jobs to fulfill your enterprise's modernization goals before optionally forwarding to the intended printers. No modifying your ERP, EMR, or other enterprise systems. No additions to your sensitive enterprise servers.

Reprocessing can include simply adding barcodes or electronic form backgrounds to eliminate purchasing preprinted forms. More sophisticated reprocessing can extract data from existing print jobs for complete reformatting to produce entirely new modernized output. Along the way, FormJet can automatically create PDF images of the print jobs for archival purposes, or for automatic distribution to email lists.

about us

TypeHaus designs and manufactures printer hardware devices and software solutions to support enterprise applications requiring enhanced printer resources. TypeHaus is recognized by Fortune 500 companies for its expertise in print stream control, line of high-quality products, and unparalleled pre-sales and post-sales customer support. TypeHaus solutions enable current and legacy systems to take advantage of the latest printing technologies. We are a stocking supplier of check stock and MICR toner. We have been providing solutions for critical document printing since 1992.

server hardware

Enterprise requirements vary. TypeHaus can accommodate server hardware to unique enterprise requirements.
